## Immigrants to America and Their Contributions to Science: An Overview of Recent Data and Policy

*Presented by:* Dr. James Witte and Dr. Michele Waslin, Institute for Immigration Research

From graduate students and postdoctoral fellows in university labs and classrooms to pharmaceutical researchers and software engineers to America's Nobel Prize winners, foreign-born scientists are a critical part of the nation's scientific community. This talk will detail some of the specifics of these contributions to date, and potential

contributions New American scientists may make in the future. We will also examine the role that federal immigration policies have played in furthering these contributions and the extent to which the changing immigration climate threatens the scientific community here and abroad.

### Location: Hylton Performing Arts Center

10960 George Mason Circle, Manassas, VA

Doors open at 6:00 pm

Scientific Discussion, Q&A and Networking Reception 7:00-8:30 pm

**Don't have time for dinner?** Food and beverages available

**Sign up to attend for free at:**
