II. WHO’S WHO IN THE DEPARTMENT

Department Chair:
Dr. Deborah Boehm-Davis  993-1398 / DK 2003  dbdavis@gmu.edu

Associate Chair for Graduate Studies:
Dr. Jose Cortina  993-1374 / DK 3074  jcortina@gmu.edu

Associate Chair for Undergraduate Studies:
Dr. James Sanford  993-1351 / DK 2046  jsanford@gmu.edu

Office Manager:
Ms. Susan Ridley  993-1398 / DK 2003  sridley@gmu.edu

Graduate Programs Coordinator:
Ms. Darby Wiggins  993-1548 / DK 2014  dwiggin3@gmu.edu

Undergraduate Program Coordinator:
Ms. Sara Montiel  993-1759 / DK 2086  smontiel@gmu.edu

Grants and Budget Administrator:
Ms. Kristin Fairchild  993-1495 / DK 2003  kfairch1@gmu.edu

Fiscal Services Assistant:
Ms. Frah Abdi  993-3235 / DK 2003  fabdi@gmu.edu

Administrative Support Specialist:
Ms. Stacey Sexton  993-1384 / DK 2001  ssexton@gmu.edu

Director of Undergraduate Advising/Teaching Assistant Coordinator:
Dr. Michael Hurley  993-1384 / DK 2086  mhurley2@gmu.edu

Laboratory Manager:
Mr. Dave Cerri  993-1353 / DK 2024  dcerri@gmu.edu

Director, Applied Developmental Program:
Dr. Susanne Denham  993-1378 / DK 1024A  sdenham@gmu.edu

Director, Biopsychology Program:
Dr. Robert Smith  993-4339 / DK 2044  bsmith@gmu.edu

Director of Clinical Training:
Dr. Jerome Short  993-1368 / DK 2057  jshort@gmu.edu

Director of the Psychological Clinic:
Dr. Lisa Meier  993-1371 / Clinic 202  lmeier@gmu.edu
Director, Human Factor/Applied Cognition Program:
Dr. Raja Parasuraman 993-1357 / DK 2055 rparasur@gmu.edu

Coordinator, Human Factor/Applied Cognition M.A. Program:
Dr. Chris Monk 993-3408 / DK 2059 cmonk@gmu.edu

Director, Industrial/Organizational Program:
Dr. Lois Tetrick 993-1372 / DK 3066A ltetrick@gmu.edu

Coordinator, Industrial/Organizational M.A. Program:
Dr. Louis Buffardi 993-1363 / DK 3072 buffardi@gmu.edu

Director, School Psychology/CAGS Program:
Dr. Grover Foehlinger 993-5127 / DK 2063 gfoehlin@gmu.edu
III. COLLEGE OF HUMANITIES AND SOCIAL SCIENCES GRADUATE POLICIES

These policies apply to all graduate students within the College of Humanities and Social Sciences (CHSS). For more specific information on your individual program, please read further on in this handbook.

Graduate Academic Standards and Grades

University course work is measured in terms of quantity and quality. A credit normally represents one hour per week of lecture or recitation or not fewer than two hours per week of laboratory work throughout a semester. The number of credits is a measure of quantity. The grade is a measure of quality. The University-wide system for grading graduate courses is as follows:

<table>
<thead>
<tr>
<th>Grade Quality Points Graduate Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+ 4.00 Satisfactory / Passing</td>
</tr>
<tr>
<td>A  4.00 Satisfactory / Passing</td>
</tr>
<tr>
<td>A- 3.67 Satisfactory / Passing</td>
</tr>
<tr>
<td>B+ 3.33 Satisfactory / Passing</td>
</tr>
<tr>
<td>B  3.00 Satisfactory / Passing</td>
</tr>
<tr>
<td>B-  2.67 Satisfactory* / Passing</td>
</tr>
<tr>
<td>C  2.00 Unsatisfactory/Passing</td>
</tr>
<tr>
<td>F  0.00 Unsatisfactory / Failing</td>
</tr>
</tbody>
</table>

* Note: Students are advised that, although a B- is a satisfactory grade for a course, they must maintain a 3.0 average in their degree program and present a 3.0 GPA on the courses listed on the graduation application.

Academic Warning

A notation of academic warning is entered on the transcript of a graduate student who receives a grade of C or F in a graduate course, or while a grade of IN is in effect.

Academic Termination

Graduate students who are admitted provisionally may be terminated from their academic programs if they fail to meet conditions of their admission in the time limits set at admission. Students admitted provisionally may be terminated upon accumulating either grades of F in two courses or nine credits of unsatisfactory grades in graduate courses. Provisionally admitted students who accumulate 12 credits of unsatisfactory grades in undergraduate courses will also be terminated. (For students admitted provisionally, graduate and undergraduate grades are not combined in the calculation of unsatisfactory credits leading toward termination.) Students may be terminated if they fail to achieve satisfactory progress toward their degree. A letter of termination is sent by the dean or director of the school/college/institute, and notification of academic termination is affixed to the graduate student's official record. Students who are terminated are no longer eligible to take courses in the program, but may apply to another degree program or take courses (in other programs) through Extended Studies.
Academic Dismissal

A graduate student is dismissed upon accumulating either grades of F in two courses or nine credits of unsatisfactory grades in graduate courses. These are minimum standards of academic performance; some programs have higher standards. A student may also be dismissed for failure to meet other program requirements such as doctoral competence examinations. The notation of academic dismissal is affixed to the graduate student's official record. A student who is dismissed may not take additional course work at the university.

Full-time Classification of Graduate Students

Graduate students are considered full time if they are enrolled in at least nine credits per semester or if they hold a full time assistantship (20 hours a week) and are enrolled in at least six credits per semester. Graduate students who are enrolled in dissertation credits (either 998 or 999) are considered full time if they are enrolled in at least six credits per semester, regardless of whether they hold an assistantship or not. Graduate students who have completed the minimum number of credits required by their degree program including the minimum number of credits of 999 required by their degree program, if any, are considered full time if they are registered for at least one credit of 999 and their advisors and department chairs certify each semester that they are working full time on the dissertation. Please note: Different criteria for full-time status may apply for tuition, verification, and financial aid purposes. Contact Student Accounts, the Registrar's Office and Student Financial Aid, respectively, for questions regarding student-specific status.

Permission to Re-enroll in Graduate Study

Permission to re-enroll in a program must be obtained by all master's and doctoral students who have failed to enroll in at least one credit of course work for two or more consecutive semesters at George Mason University. A program may allow a student to petition to graduate under any catalog in effect while the student was enrolled. The final decision rests with the unit dean or director. Forms are available from the Office of the Registrar, 703-993-2441.
IV. INTRODUCTION

Welcome to George Mason University’s Human Factors and Applied Cognition (HFAC) Program. The faculty looks forward to a rewarding professional association with you during this important portion of your career.

Professional psychology involves the responsible use and practice of psychological knowledge in the solution of people-related problems in settings of many kinds. As professionals, our challenge is to enhance psychological knowledge and its practice while we are engaged in improving the world. You are now in the process of joining our community of applied psychologists who teach, consult, and work in a wide variety of settings—the university, government agencies, industries, associations, and private practice. We will also serve as your advisors, mentors, and friends.

Your masters and doctoral training will serve as an apprenticeship to provide you with the knowledge and experience that will enable you to move easily and confidently into the world of applied psychological work. During this apprenticeship, you will have opportunities to develop through coursework and various research experiences. You will advance through core courses, advanced quantitative and specialized content courses. Along the way you will have had research and practical experiences inside and outside the university that will provide valuable introductions to the world of applied psychology, its challenges and opportunities.

You will be examined at various points to assess your progress and determine whether you are ready for the next steps in the journey toward full professional competence. A satisfactory grade in each of the core courses serves to qualify you for continuation in the program. Doctoral students will take a comprehensive examination mid-way through the program which will be based upon advanced knowledge in the student’s areas of specialization.

However, satisfactory progress in our graduate programs isn’t just a matter of doing well in coursework. The biggest difference you will note between our masters and doctoral program and your previous academic work is the amount of time you are expected to devote to research not associated with any formal coursework. Our doctoral program doesn’t exist just to pass on existing knowledge; we are dedicated to expanding the knowledge base of our field and enthusiastically welcome your contributions to this endeavor.

For students in the doctoral program, to ensure that you develop the necessary skills, you will participate with a faculty research team from your very first semester in the program. You will also be asked to co-author a manuscript with the faculty member(s) by the end of your second year, with the expectation that it is submitted to a scholarly journal or peer-reviewed conference. These experiences will help prepare you for the development, conduct, and defense of your dissertation - the capstone (and final step!) of your doctoral degree.

Upon fulfilling all requirements, you are awarded the degree Master of Arts in Psychology or a Doctor of Philosophy, symbolizing the completion of a comprehensive, scientist-practitioner program designed to develop a fully capable and responsible applied psychologist. The journey may be long and difficult, but we hope that you will find it exciting and immensely fulfilling.
V. THE ADVISOR

An advisor serves a number of functions for students. In conjunction with the student, an advisor helps determine the schedule of classes for each semester, answers general questions about the program, and helps guide the student in terms of their specialty and research interests.

An advisor is the first point of contact for any problems that may arise and should be consulted before any program changes are made. An advisor helps the student with practicum placements and should be kept up-to-date on when a student intends to seek a practicum placement and what type of setting is preferred, and may suggest alternate placements when this seems appropriate. For Doctoral students, an advisor also helps with the formation of the Dissertation Supervisory Committee. In addition, an advisor serves as the route of communication for departmental evaluations of the student’s progress in the program. In short, the advisor is the student’s advocate and the student should develop a close professional relationship with him/her.

Since entering students’ needs are somewhat different from those of advanced students, an advisor is appointed for those students. All MA students will be advised by Dr. Chris Monk, the MA Program Coordinator. For entering doctoral students, this advisor provides an orientation advising session that helps students determine the courses they will take for the first two years of the program. This orientation advising is also designed to familiarize a student with the program and to answer to general questions.

After doctoral students have familiarized him/herself with the program demands and the various areas of expertise of the faculty, he/she may wish to select a new advisor. When the student has identified a faculty member whose specialty and research interests are close to his/her own and who is willing to work with the student, contact the Director of the Program with a request to change advisors. The Program Director will assist the student in this change. The student may also change advisors should his/her research interests change over time. Again, contact the Director of the Program to help with the change of advisors.

Approval to Schedule of Classes

Before enrolling each semester, a student should contact his/her advisor and plan a schedule of classes for that semester. A student may change this schedule of classes; the advisor should be immediately notified about the change. Students are expected to take certain classes during their first two semesters in the program. These courses include PSYC 611—Quantitative Methods I during the first semester and PSYC 612-Research Methods during the second semester. However, MA students with insufficient statistics background may elect to take these courses in the second year. Students should begin taking the proseminars as soon as possible since these courses must be completed before the comprehensive examination may be taken.
Full-Time and Part-Time Status

The HFAC Faculty at George Mason University requires that doctoral students be committed to the program on a full-time basis. A full-time academic load consists of 9-12 credit hours per semester (6 for 20/hr per week GRA/GTA), ensuring that the student completes at least 18 credit hours during the regular academic year. This schedule, of course, leaves the summer available to accumulate additional credit hours. MA students may pursue their degrees on a part-time basis.

Students who choose to pursue their masters and doctoral training while employed must recognize that flexibility from their organization is a requirement for participation in the doctoral program (this usually means a maximum of 20-30 work hours per week). There are academic functions (research team meetings, colloquia, etc.) that are required during daytime hours and employed students are expected to attend just as full-time students are. Failure to comply with this requirement constitutes grounds for a separation of a student from the program.

Please note: Different criteria for full-time status may apply for tuition, verification, and financial aid purposes. Contact Student Accounts, the Registrar’s Office and Student Financial Aid, respectively, for questions regarding student-specific status.

Annual Evaluation

Each doctoral student’s academic, professional, and practicum performance is evaluated each year by the HFAC Faculty. Although students will complete and turn in a summary of activities and accomplishments (see Graduate Student Annual Report form on the next pages), it is the responsibility of a student’s advisor to present the HFAC Faculty with a report of the student’s progress in these areas.

After completing and returning the annual update form (usually in December of each year), the student meets with his/her advisor to discuss his/her progress and the information that is to be presented to the HFAC Faculty. This meeting covers the information on the annual update form. The faculty advisor and the student discuss the student’s academic performance that includes but may not be limited to the student’s progress regarding his/her Program of Study, grades and general verbal and written performance in academic classes with comprehensive readiness as a criterion. The faculty advisor discusses the student’s professional development which includes but may not be limited to the students attendance at departmental functions, the student’s general professional attitude, the student’s attitude toward peers and faculty, and departmental service which encompasses the student’s ability to cooperate with colleagues and faculty in areas service. Should the student be deficient in any of these areas, he/she is informed of this and recommendations to remedy the situation are given the student in writing.

Registration

All students are advised to register as early as possible for each semester’s classes. Long before classes begin, the Administration at George Mason reviews the enrollment in each class. If a class does not have sufficient enrollment, it is canceled. This can be very disruptive for a student’s program as some classes are offered only once in a three year period. Therefore, the HFAC Faculty request that you register as soon as possible.
Conferral of the Master’s Degree

The student may be awarded a Master’s Degree in Psychology after completing 32 semester hours of graduate credit in Psychology that satisfy MA catalog requirements for the Human Factors and Applied Cognition specialization programs (see current Catalog).
VI. MASTERS PROGRAM IN HUMAN FACTORS AND APPLIED COGNITION

The Human Factors/Applied Cognition specialization trains students in the application of cognitive sciences to “real-world” problems. Students gain expertise in cognitive theory and human factors techniques, along with experience in domains as diverse as human-computer interaction, aviation, transportation, and communication. Faculty help place students who do not have real-world experience in part- or full-time practicum before completing their degree.

Degree Requirements:

1. 32 hours of graduate credit

2. Cognitive Core: 3 hours selected from PSYC 701, 766, or 768

3. Quantitative and Research Methods courses (8 hours)
   - PSYC 611 – Advanced Statistics Research Methods I
   - PSYC 612 – Advanced Statistics Research Methods II

4. Specialization courses (12 hours minimum)
   Required: PSYC 530 – Cognitive Engineering: Cognitive Science applied to Human Factors
   PSYC 645 – Research methods in Human Factors/Applied Cognition
   Select two from the following:
   - PSYC 734 – Seminar in Human Factors/Applied Cognition
   - PSYC 737 – Psychology of Human-Technology interfaces
   - PSYC 766 – Advanced Topics in Sensation and Perception
   - PSYC 768 – Advanced Topics in Cognitive Science
   (Note: With permission of advisor, 645, 734, 737, 766, and 768 may be repeated for credit.)

5. Electives: Students may choose to take up to 6 hours of practica (contingent on availability) and/or up to 6 hours of thesis research. The Chair’s permission is required for the thesis option and a form is available from the graduate secretary. Alternatively, up to 9 hours of electives from within or outside the department, may be taken with advisor’s approval (The list changes every semester--see your advisor).

Thesis Option
A thesis is not required for the MA degree. For those masters’ students who wish to pursue this option, however, the following policies apply. Up to 6 hours of thesis research (PSYC 798 and PSYC 799 combined) may be used as elective credits. The thesis should demonstrate the student’s capacity to carry out independent research. The research project will
be closely related to his/her general educational objectives and should provide the student with the opportunity to contribute to knowledge in psychology. The student should begin to think seriously about a thesis problem as soon as possible in his/her graduate career.

The following guidelines are to provide assistance in preparing for thesis deadlines. More specific guidelines may be found in the *Guide for Preparing Graduate Theses, Dissertations, and Projects*. Copies may be obtained from the CHSS Graduate Student Coordinator in College Hall, room C112, or by visiting the following link: http://psychology.gmu.edu/Graduate%20Student%20Resources/index.htm

Students working on a thesis proposal enroll in PSYC 798. Students who have an approved proposal and are conducting the research enroll in PSYC 799. Credits earned for Directed Readings will not be converted to thesis credits.

**Thesis Advisor and Committee**

The thesis advisor works closely with the student in developing and focusing the research problem or question; writing the thesis proposal; collecting, analyzing, and interpreting the data; and writing the final version of the thesis. The thesis advisor will help to choose the members of the Thesis Committee. The list of faculty interests at the end of this handbook may be of assistance in identifying an advisor and/or thesis advisor.

The Thesis Committee consists of three persons, including the thesis advisor. The thesis advisor must be a full-time faculty member in the Department of Psychology. At least one of the other two members must also be full-time faculty in the Department of Psychology. The task of this group is to provide advice and consultation at all stages of the thesis, particularly in the development of the proposal. The point at which this committee is formed is left to the discretion of the thesis advisor.

An approval to pursue Master’s Thesis Form is available at: http://psychology.gmu.edu/Graduate%20Student%20Resources/diss_thesis.htm

**Thesis Proposal**

The thesis proposal consists of the following:

Cover sheet—format is found at: http://thesis.gmu.edu

A statement of the major problem or research and supporting problems, not to exceed six double-spaced pages. The proposal should include a very brief review of the literature and the methods proposed to carry out the research.

The thesis proposal must be approved by the thesis committee, the Program Coordinator, and the Associate Chair for Graduate Studies. It must then be submitted to the Dean’s Office before registration for thesis credit (PSYC 799). Six copies of the typewritten thesis proposal should be submitted to the major thesis advisor. These will be forwarded to the Associate Chair for Graduate Studies and the Dean via the Graduate Programs Assistant.
**Thesis Proposal Presentation**

The thesis proposal must be presented to the thesis committee for approval. This presentation is open to anyone who wishes to attend and should therefore be announced to the department. The student should discuss the procedure for this presentation with his/her thesis advisor.

**Writing the Thesis**

The thesis is to be written to conform to the standards of the American Psychological Association as published in the third edition of the *Publication Manual of the American Psychological Association*. Before a draft is submitted to the thesis committee, the student and his/her advisor should have perfected the paper as much as possible in terms of content, grammar, and format. The members of the Thesis Oral Examination Committee should receive a draft in sufficient time for them to read and critique the paper, and for the student to make any necessary revisions prior to the submission deadline. The final draft must be approved by the Thesis Oral Examination Committee, the Area Coordinator, and the Associate Chair for Graduate Studies, with an original and one approved copy submitted to the Dean by the date announced in the catalog.

**Thesis Oral Examination**

An oral defense of the final thesis to the Thesis Committee is required. The defense is concerned with the problem, design, method, interpretation, and knowledge in the general area of the thesis. The defense is conducted by the thesis advisor. Successful completion of the defense is reflected by approval of the thesis committee. The defense may be attended by any interested persons; thus, the date should be provided to the Graduate Programs Assistant at least two weeks in advance.

The defense should be conducted no later than three weeks prior to the date specified in the calendar published in the University Catalog for receipt of the final thesis in the College of Humanities and Social Sciences office. Such scheduling will help assure adequate time for making revisions in the final draft. Scheduling of the date for the exam is the responsibility of both the student and thesis advisor.

**Guidelines for Dissertation, Thesis, and Travel Support Application**

The department will provide up to $200 to cover the cost of master’s thesis research. Only MA students are eligible for master’s thesis support. Doctoral students who elect to write a masters thesis are not eligible for this support. These funds are to be used to assist in the collection of data, including payment to participants if the research requires a population not readily available at the University. All equipment, books, software, tests, etc that are purchased with department funds becomes the property of the department. These funds are provided in the form of reimbursements for expenses, not cash grants or up-front money paid to vendors. Therefore, keep good records of your expenses, including all receipts. Only original receipts (not photocopies) will be accepted.
Requests should be submitted to the Associate Chair for Graduate Studies. To apply, you must provide:

1. A copy of the signature sheet of your approved dissertation or thesis proposal.
2. A budget that specifies how you plan to spend the money.
   - The budget must be signed by your advisor.
   - If the budget includes copying, office supplies, postage, and other such items that can be purchased by or through the department, the budget must be reviewed and initialed by the Associate Chair for Graduate Studies prior to submission.
3. A statement from your advisor that he/she does not have funds to support this research (e.g., from a grant).

The programs specify some courses which are required in order for students to acquire a specialty in that area. That is, the program requirements narrow some of the choices among courses to ensure that students acquire the necessary expertise in an area. The requirements for the various programs are as follows.
VII. DOCTORAL PROGRAM IN HUMAN FACTORS AND APPLIED COGNITION

The programs specify some courses which are required in order for students to acquire a specialty in this area. That is, the program requirements narrow some of the choices among courses to ensure that students acquire the necessary expertise in an area. The requirements for the various programs are as follows.

**HFAC Program Requirements:**

**General**
- 3 hours cognitive core (701, 766, or 768)
- 6 hours of biological (702, 558, 559 or 685), social (703, 667), developmental (704, 666, 669), or history (705) core
- 8 hours of quantitative and research methods:
  - PSYC 611 Advanced Statistical and Research Methods for Psychology I
  - PSYC 612 Advanced Statistical and Research Methods for Psychology II
- 9 hours of Advanced Methods (statistics, research methods, or modeling)

**Human Factors & Applied Cognition Core**
- 6 hours PSYC 530, 645
- 9 hours (minimum) PSYC 734, 737, 766, 768 (these may be repeated)

**Professional Issues**
- 3 hours PSYC 890

**Dissertation Proposal and Dissertation**
- 12 hours of PSYC 998 and 999

**Practicum (Optional)**
- 6 hours, with permission of advisor. (Students who wish to have real-world experience of Human Factors or Applied Cognition may take up to 6 hours of Practicum.)

**Research Requirements**
- During their first year in the program, students are required to write a research proposal, to be evaluated by faculty in the program. In their second year, students are required to execute research and submit it for publication in an appropriate outlet. This research and paper will be evaluated by faculty in the program.

**Options**
- To reach the 72 credits required for the Ph.D., students may repeat 645, 734, 737, 766, and/or 768. Students may also take credits outside of Psychology with program approval (see p. 12).
Students should take credits in PSYC 897 (Directed Reading and Research) each semester until they begin work on their dissertation proposal; at that point, they should take PSYC 998.

Students are strongly encouraged to develop competence in programming and computer science by coursework or independent study. Students are also encouraged to identify and take relevant courses within or outside the department (with advisor’s approval).

**Typical Curriculum for Human Factors/Applied Cognition Program**

<table>
<thead>

</table>

**Any remaining semesters**

| Cog/HFAC Seminar (3)              |
| 998/999 (1-6)                     |

**Addenda:**

1. Students are expected to submit a research proposal (plan for original research) by the end of the spring semester (end of exam period) of their first year.
2. Students are expected to submit an original research paper to journal or conference by the end of their second year.
3. Students are encouraged to take 3-6 credits of Practicum (730) during one summer.
4. Maximum of 6 hours of Practicum (730) may be applied to the degree.
5. Students are expected to take one course per semester post comps.
6. Students are strongly encouraged to develop competence in programming and computer science by coursework or independent study. Students are encouraged to identify and take relevant courses within or outside the department (with advisor’s approval).
7. Total number of course hours must total a minimum of 72 hours.

The Core Areas

There is no qualifying examination per se for the core areas required for the Ph.D. degree at George Mason University. A student in the Applied Experimental Program is considered to have passed the qualifying examination by satisfactorily completing the required courses from the core areas and methods with a grade of B or better.

Failure to Pass a Core Area Course

Should a student fail to make a grade of B or better in a core area course, the student may retake the course once. If the student passes the course with a B or better, he/she is considered to have satisfied the requirement for the qualifying examination. Should a student fail to make a B or better in a second core course, the student may retake a second core course and must make a B or better to satisfy the requirement for passing a qualifying examination. If a student fails to make a B or better when retaking a core course, he/she is separated from the program.

Repeating the course(s) is the only way that a student may satisfactorily meet the requirement of qualifying examination. Students must satisfactorily complete the core courses before they may take the comprehensive examination.

Course Equivalency Documentation

Students may apply for exemption from up to 30 hours of doctoral coursework. To do so, the student must present documentation and written justification for these exemptions. Documentation consists of the following information:

1. Course title and a transcript showing the grade for the course.
2. A copy of the catalog description of the course.
3. A syllabus for a course or a list of topics covered in the course.
4. Identification of the text(s) used in the course.
5. Examination questions
6. Any papers or projects written for the course.

Students are not likely to have all this documentation; however, 1, 2, 3, and 4 are mandatory.

In rare instances, a student may wish to petition for an equivalency examination when he/she has not had a graduate course or courses in an area required for his/her degree. Such a student may feel that he/she has acquired equivalent knowledge and therefore,
should be exempted from taking the course. In this case, the student should present and especially strong justification for being allowed to take an equivalency examination.

Graduate Student Annual Report
For Calendar Year _____

Name________________________________________ Date____________________________________

Year entered program______________ Advisor________________________

INSTRUCTIONS: Complete this report to the best of your abilities on the electronic version and email it
to your advisor as an attachment by January 31st of each year. Use "N/A" if an item does not apply to you.
Expand and shrink the section sizes as appropriate. Keep your electronic copy so that you can simply
update it each year.

1. Statement of current research interests.

2. Research activities in the current year including thesis and dissertation (including description of projects
worked on, which research group or person you worked with, your responsibilities in the project, status
of work products, plans for subsequent research):

3. Manuscripts submitted to journals and papers published (including technical reports):

4. Conferences attended (including papers submitted to conferences and actual program participation):

5. All graduate courses taken in the program (including this semester). Semester (e.g., S99, F00), course
number (e.g., Psyc 645), title (e.g., Cognitive Task Analysis), type of course (core, methods, breadth,
depth), instructor, credit hours, and grade (if available). Include courses like Thesis Research and
Direct Readings and Research.

6. Date of comprehensive examination (actual or projected and if completed, result of exam):

7. Status of dissertation (including work preliminary to dissertation, dates of projected completion):

8. Service activities (area projects or committees, Departmental committees, off campus activities, professional activities, etc.) during period:

9. Informal presentations (e.g., Brown Bag) during period:

10. Self-assessment of strengths and weaknesses (including content areas and research skills, assessed with regard to time in program)

   Strengths:

   Weaknesses:

11. Goals for the next calendar year (skills to be acquired, activities planned, outcomes anticipated):

12. Future career plans (e.g., applied research, academic appointment, consulting, corporate staff position, government agency, military):
**Program of Study (POS)**

***Doctoral Students Only***

**What is a Program of Study**

A Program of Study is a projection of all of the courses that you intend to take to complete the requirements for the doctoral degree. This projection includes the tentative dates for taking the courses and the anticipated date of the comprehensive examination. If you have taken coursework elsewhere, transfer of credit must be arranged.

**How to Determine the Program of Study**

The student should meet with the advisor sometime during the second year but no later than the end of the second year with the intention of determining the Program of Study.

**Submission of the Program of Study**

After the Program of Study is determined by the student and advisor, the Program of Study Form is completed. It is signed by the advisor and forwarded to the Program Director. The Program Director presents it to the HFAC faculty, if approved, signs and forwards the Program of Study to the Graduate Programs Assistant (Darby Wiggins, dwiggin3@gmu.edu) who will then forward it onto the Associate Chair for Graduate Studies and to the Dean of CHSS for approval. Students are encouraged to submit an electronic copy to the Graduate Programs Assistant prior to submitting a hard copy to ensure that it has been filled out correctly. Additionally, students should keep an electronic copy for their records should any changes need to be made in the future. Students are encouraged to email a copy of their POS to the Graduate Programs Assistant for review prior to obtaining signatures.

**Making a Change in the Program of Study**

Should a student wish to make some change in the Program of Study after it has been submitted to the Dean, he/she must consult with and gain written approval from the advisor, program director, and the dean. A copy of the addendum will be placed in the student's file.

Major Advisor  

Director of the Program  

Associate Chair for Graduate Studies  

Date  

Date  

Date
VIII. HUMAN FACTORS/APPLIED CONGNITION COMPREHENSIVE EXAM

The comprehensive examination is the final step toward advancement to candidacy for the doctoral degree. It is designed to examine a student's knowledge of his/her chosen specialty area or program and indicates a student's professional competence in that area. When a student has passed the comprehensive examination, he/she may be advanced to candidacy and proceed with a dissertation. Once advanced to candidacy, the student has a maximum of five (5) years to complete the dissertation.

Structure of the Examination

The comprehensive examination consists of questions based on four specialized reading lists developed by the student, in conjunction with his/her comprehensive committee. The topics of the four lists should reflect the student’s breadth while the contents of each reading list are expected to reflect the student’s depth.

The student should submit a draft of the specialized list to his/her comprehensive committee. The committee is free to revise this list. The reading lists must be approved and delivered in writing to the student’s committee at least three (3) months before the date of the exam. Although reading lists serve as the basis for questions, students are expected to synthesize material across their entire program of study.

Composition of the Comprehensive Committee

The Comprehensive Committee shall consist of three members. The student selects the major advisor (chair) of their committee. The student and the major advisor then select two other committee members. At least one of the other members must be from the GMU Psychology Department faculty. If deemed appropriate by the advisor, up to one member may be from outside of Psychology.

When to Take the Comprehensive Examination

Student will be expected to take comprehensive exams following their third year in the program. Students will schedule the specific date of their exam in consultation with their supervisory committee.

Evaluation Process

Each question is graded on a scale from 12 = A+, 11 = A, 10 = A-, 9 = B+, 8 = B, 7 = B-, 6 = C+, 5 = C. To pass, students must meet the dual minimum criteria of (a) an overall average of B or better and (b) 2 of the 4 grades B or better. For example, grades of A+, B+, B, and C (mean = 8.5) would meet these dual criteria while grades of A-, B+, B-, and C (mean = 7.8) or A, B+, B- and C (mean = 8) would not. The Chair of the Comprehensive Supervisory Committee provides written feedback to the student regarding his/her performance on the examination.
The dimensions of evaluation will be (1) the responsiveness of the answer to all components of the question; (2) the comprehensiveness of the answer in terms of breadth, depth, and conceptual structure within each of the relevant domains; (3) the timeliness of the answer or how well the answer reflects the latest literature and findings in the targeted domains; (4) the degree of integration across multiple knowledge domains reflected in the answer; and (5) the quality of writing and presentation.

Students who demonstrate weakness but still pass the overall examination will be required to complete developmental exercises as defined by the graders of the questions. These may include, but are not limited to, the following possibilities: a revision or rewrite of certain answers; enrollment in a particular class; or ancillary projects designed to develop skills in required areas. All developmental exercises must be completed satisfactorily before the student is admitted to doctoral candidacy.
IX. PROFESSIONAL ETHICS

Both faculty and students are expected to abide by the ethical code set forth by the American Psychological Association (see http://www.apa.org/ethics/). Past literature on ethical problems has generally focused on issues in clinical psychology. However, Division 14 of the American Psychological Association has recently published a casebook particularly appropriate to other areas of psychology, The Ethical Practice of Psychology in Organizations (2nd Ed), Lowman, ed. (2006). This book is available for $39.95 from American Psychological Association.

Ethical issues are addressed formally in both the Practicum (PSYC 730) and Special Topics in Professional Issues (PSYC 890). However, in order to minimize the possibility of ethical conflicts, students and faculty should familiarize themselves with the previously mentioned documents and not depend solely on classroom discussion of such issues. If you believe an ethical violation may have occurred, discuss this with either your advisor, the Program Director, or write or call the American Psychological Association Ethics Office in Washington, D.C.

Policy on Discrimination

The university does not tolerate discrimination on the basis of age, race, sex, national origin, or religious beliefs. If you believe you have been subject to such discrimination, you should contact the Chair of the Department or the university's affirmative action/equal employment officer as soon as possible.

Policy on Sexual Harassment

Sexual harassment by either faculty or students will not be tolerated by the Psychology Department or the university. If you believe you have been subject to sexual harassment, you should contact your advisor, the Chair of the Department or the university's affirmative action/equal employment officer as soon as possible.
X. RESEARCH REQUIREMENTS

Purpose
In addition to passing on existing knowledge to a new generation of psychologists, quality doctoral programs are dedicated to expanding the knowledge base of the field. Hence, the development of the student's research skills is of primary importance.

Initial Research Experience
Incoming HFAC students register for a Directed Research course (PSYC 897) with a particular faculty member for each of their first six semesters in the program (one to three credits per semester), depending on the program. Students will normally be assigned to their initial advisor's research team which meets on a regular basis.

Students are expected to familiarize themselves with the research projects of other program faculty by attending colloquia, brown-bag lunch presentations and other informal means. As research interests crystallize, students may request to participate on other research teams upon mutual consent of involved faculty.

By the end of the first year, the doctoral student must author a research proposal and have the proposal approved by his/her major advisor.

Second Year Research Requirement
By the end of their second year, doctoral students must (co)-author a manuscript that is submitted to either an appropriate scientific journal or a regional/national professional convention. Any entering doctoral student who previously has completed a research master's thesis would be required by the end of their first year to submit the manuscript to a journal or professional meeting. Such students would still be required to actively participate with a faculty research team.

After Completion of the Second Year Research Requirement
Students are expected to continue working with faculty research teams throughout their program. This will foster the continued maturation of their research skills and facilitate the development of a quality doctoral dissertation proposal.
XI. COLLOQUIA & BROWN-BAG LUNCHES

Colloquia and Brown-bag lunches are presentations given by professionals from outside George Mason University, members of the faculty of the Psychology Department, and your student colleagues. As potential professionals, the student is expected to attend these functions as part of his/her commitment to the field. The HFAC Brown-bags are generally held on Wednesdays at noon.

Making professional presentations is one of the most important skills that student apprentices must learn. Such presentations are expected whether one works in an applied area or in basic research. In applied settings, professionals are expected to make presentations about in-house projects or contract proposals, while academics are expected to make presentations before colleagues at conventions about their latest research. It is common for a student to make presentations at both practicum sites and conventions. Doctoral students should expect to make at least one Brown-bag presentation per year in the program.

The department attempts to bring in speakers from outside the department for several purposes. These speakers are usually prominent professionals whose presentations educate students in the most current developments in the field. These colloquia also provide opportunities for students to meet these professionals and to make contacts that will be useful in the future. Finally, such gatherings provide opportunities for students to become "socialized" as a professional.

Faculty speakers also serve multiple functions. Such seminars provide students with opportunities to learn about faculty research. It also provides opportunities to learn how to detect contributions as well as design and logic flaws and how to raise these issues appropriately.

Finally, all students will be required to make presentations as part of their practicum experience and dissertation work. Such presentations give students the practice that they will need as a professional.

Attendance at professional meetings and social functions not only enhance a student's professional socialization but provide yet more opportunities to “network.” As you will see, the professional world is quite small, and these contacts become invaluable in gaining employment, getting needed expertise, and evaluating projects and colleagues.

Special Topics in Professional Issues

One of the requirements for the Ph.D. degree is enrollment in Special Topics in Professional Issues (PSYC 890) to be taken in the 3rd or 4th year. This requirement consists of one three-hour seminar course on issues that are deemed highly relevant to your professional expertise. These seminars are scheduled in the fall semester every other year and are graded on a satisfactory/not satisfactory basis.
The Special Topics in Professional Issues deals with topics such as jobs and employment-related issues (i.e., resume building, oral communication skills, interviewing skills, networking and kinds of jobs), ethics, grants, contracts, written proposals, financial proposals, project reports, personnel selection and other topics related to funding. Students will have the opportunity to apply what they have learned in this seminar by writing a proposal.
XII. THE PRACTICA

Purpose
The purpose of the practica (PSYC 730) is to provide learning experiences in the professional application of psychology and in conducting research in work settings (on-site practica) or under direct supervision of a faculty member (in-house practica).

Fulfilling the HFAC Practicum Requirements
Human Factors and Applied Cognition Doctoral students who lack professional work experience in an HFAC area are strongly encouraged to take 3-6 hours of practicum credit. Practicum credits must be completed in an Industrial or Government Laboratory. Although there are no formal course prerequisites for practicum placement, generally HFAC students are required to have been enrolled full time in the program for two semesters (or the equivalent) and to have obtained the permission of their graduate advisor.

The Criteria for Practicum Credit
Doctoral students are eligible to enroll for on-site practica at the time of completion of course work that is most applicable and relevant to the particular practicum site. Normally this will not occur until after the completion of two full-time semesters of graduate work at GMU. The goals of the on-site practica are to provide both professional socialization and a sufficient range of experiences so that graduates of the program are well-prepared professionals. Students should confer with their advisor and the faculty responsible for practicum for suitable placements.

Students are expected to work a minimum of 100 hours for each credit hour of PSYC 730 for which they are enrolled. Students typically register for 3 hours of practicum at a time, and are allowed a maximum of six hours of PSYC 730 in a given semester.

When to Enroll in a Practicum
The key consideration for determining the acceptability of a practicum placement is that it be a learning experience for the student within the field of Human Factors Psychology. To this extent, the following criteria will be used to assess potential placements:

For on-site practica
a. The student must receive on-the-job guidance/instruction from a supervisor with specialized knowledge in an applied area (e.g., a training director, research director, testing coordinator, etc.). This person will generally possess an advanced degree in psychology or a related discipline.
b. The practicum experience must not involve only skills already learned. Although this might be beneficial to the sponsoring organization, it would not facilitate the acquisition of new knowledge and skills by the student.

c. If a student is already employed, no practicum credit will be granted for performance of regular job duties (e.g., those listed in the job description). Employees are generally hired on the basis of current skills; in the performance of regularly assigned duties they typically perfect old skills but seldom acquire new professional skills to the extent desirable for a practicum. For this reason, students working full-time will usually not be able to apply these hours toward their practicum. If an employed student can demonstrate that a special project (above and beyond regularly assigned duties) would meet practicum criteria, hours spent on said project may be considered for practicum credit. Such appeals will be decided upon by the committee appointed to assess practicum placement requests.

Examples of On-site Practica

Faculty responsible for coordinating practica will have a list of available practica sites. On-site practica generally fall into one of the following areas of professional training:

- Human Factors and Applied Cognition, including: simulation and training, human-computer interface, or systems design.

Procedures for Enrolling in Practicum

Registration for practicum takes careful planning; do not impulsively enroll in 730 because there is nothing left that fits your program. To maximize the potential benefits of this valuable experience, students should follow these recommended procedures:

Two Semesters Prior to Registering for Practicum

- Attend practicum presentations of current students (usually scheduled the early in the semester).
- Contact Cooperative Education (Student Union I) to inquire about internship possibilities.
- Join a local professional society to enhance your network of local professionals, e.g.,

  **Society**  
  Human Factors And Ergonomics Society (Potomac Chapter)  
  **Faculty Contact**  
  Parasuraman

60 Days Prior to Registering for Practicum

- Complete an “Intent to Register” form and submit it to faculty member coordinating the upcoming practicum course.
- Contact the faculty member coordinating practica.
- Notify faculty coordinator of any “lead” you have developed for permission to pursue the lead.
- Contact leads provided by faculty coordinator.
- Interview with potential on-site supervisor.
- If interview result appears promising, file a “Practicum Application Form” with faculty coordinator no later than 1 week prior to the beginning of the semester.
- Fill out and complete the Experiential Learning Agreement and have your Site Supervisor as well as the Program Coordinator and/or Associate Chair for Graduate Studies sign the form.

**During the Semester in which You are Registered for Practicum**

- Attend practicum class meetings.
- Notify faculty coordinator of any problems you are having at the practicum site.
- Complete course requirements (e.g., oral presentation, etc.).
- Provide on-site supervisor with “Practicum Certification form” to be completed and returned to faculty coordinator.
- Complete “Practicum Summary Form” for inclusion in the binder available to future graduate students.

**Grades**

Students receive either S (“satisfactory”) or NC (“no credit”) grades for the course. If the required number of hours has not been completed and all course requirements fulfilled by the end of the semester, a grade of IP (“In Progress”) will be assigned. Upon completion of all requirements, the faculty practicum coordinator will file a change of grade.
XIII. DOCTORAL SUPERVISORY COMMITTEE

Students may begin work on their dissertation as soon as their advisor feels they are ready (typically, in their third or forth year in the program. Although the student’s committee cannot be formally appointed until after they are advanced to candidacy, students should work with their advisor to select their preferred committee members at this time. This committee is responsible for approving the doctoral dissertation proposal, supervising all aspects of the dissertation such as research design, data collection, data analysis and the writing of the dissertation. This committee reads the various drafts of the dissertation guiding the student in the direction that the dissertation should take and directing the student in the various changes that are necessary. Although the committee has the ultimate responsibility for the dissertation, the Doctoral Supervisory Committee advisor gives the primary guidance to the student.

After a student has passed the comprehensive examination and been advanced to candidacy, he/she is formally ready to begin work on a dissertation. The first formal step in pursuing the dissertation is to form a Doctoral Supervisory Committee. To form your committee, your advisor should send a note to the Graduate Secretary outlining the preferred members of the committee.

The Composition of the Doctoral Supervisory Committee

The doctoral supervisory committee consists of at least 3 members, all of which must be members of the Graduate Faculty at George Mason University. The major advisor from the psychology department and the student select a second faculty member from the department to serve on the committee. A third member from outside the department is chosen. The major criterion for selection of this outside member is his/her ability to contribute to the dissertation project. Additional members who are not part of the GMU graduate faculty or who are from outside the university may also be appointed to the committee, but these individuals cannot serve as the required member from outside the department.

The department chair is responsible for recommending the doctoral supervisory committee to the Dean. The Dean then appoints the members and reserves the right to make such substitutions as appear to be necessary, but always after consultation with the department chair. The dissertation advisor is responsible for notifying the department of the desired composition of a student's committee. The student and all members of the committee will receive a formal appointment letter from the Dean of the College of Humanities and Social Sciences.
XIV. THE DISSERTATION PROPOSAL

The doctoral dissertation proposal provides a focused literature review, well-developed rationale, a research design, and a data analysis plan. A 10-20 page literature review is a rough guideline, although relevance of coverage is the primary criterion for length. During the period that the Doctoral Supervisory Committee is reviewing a dissertation proposal, the student is required to enroll in a minimum of three (3) hours of PSYC 998 - Dissertation Proposal. Normally the student will make an oral presentation of the dissertation proposal to the entire committee. After this committee approves the dissertation proposal, the student forwards it to both the Program Coordinator and the Associate Chair for Graduate Studies for approval. If acceptable, the proposal will be forwarded to the Dean for approval; the student is ready to enroll in PSYC 999 – Dissertation once the Dean has approved the proposal

Dissertation Proposal Approval Process

1. An approved proposal signifies the following:
   The proposal contains a clear, focused literature review germane to the dissertation. The committee approves the experimental design, choice of variables investigated, procedures, and the rationale behind the proposal. There is a clear set of hypotheses, and enough detail on planned statistical analysis for the committee to be clear on the planned procedures; the committee is satisfied that the procedures are appropriate to the design, hypotheses, and variables investigated.

   a. After proposal approval, the committee may NOT require: additional dependent measures and a significant modification to the design.

   b. The committee MAY require: a few additional statistical analyses if planned analyses, upon reflection, indicate this would be appropriate; updated, re-written literature review when the dissertation is final; and extended discussion based upon data and analysis.

2. The Proposal Approval Process

   a. The student selects a dissertation advisor with assent of the faculty member.
   b. Student and advisor select a general area for the dissertation.
   c. Student, in consultation with advisor, develops and revises rough drafts of proposal.
   d. In consultation with advisor, student selects committee. The committee composition must follow University and department guidelines, and must include one member from the Applied Experimental Area. [Note: assent of faculty members to participate in a dissertation is voluntary. The department expects that all faculty be willing to participate as advisor or committee member on some dissertations; participation on a particular dissertation is completely voluntary. If a student cannot obtain voluntary consent of a committee, the dissertation cannot proceed.]
e. When the advisor agrees that the rough draft proposal is far enough along, the draft is distributed to the committee at least 2 weeks before the initial committee meeting. This meeting approves or directs changes in the scope and design of dissertation, with feedback on what changes are required before final approval.

f. The number of meetings of the committee will depend upon the progress of the student. Committee goodwill can be maximized by working individually with the advisor between meetings, and making substantial progress before calling another meeting.

g. Committee signature on the proposal signifies that the committee agrees that the design, hypotheses, statistical analysis, and literature review are appropriate for a dissertation, and the document is well written. Chair signature indicates concurrence.

h. A hard-copy of the proposal should accompany the signature sheet to the Graduate Program Office for the Associate Chair for Graduate Programs to sign

3. During the dissertation

Normally, frequent committee meetings are unnecessary and burdensome. Frequent consultation with the advisor is essential. Occasional brief progress reports to the committee are often appreciated. Committee consultation is usually necessary only when substantial changes must be made to the approved proposal.

4. Writing up the dissertation

Although students may consult with committee members who have special expertise (e.g., statistics) during the analysis phase, normally, the analysis, interpretation, and write-up are done by the student in close consultation with the advisor. The dissertation should be submitted to the full committee only when the student and advisor believe that the dissertation is nearly in final form.

The committee, however, is not bound to accept the draft presented. The committee can require additional changes in writing to clarify the document, etc., or can require a reorganization of major portions of the dissertation.

When the committee requires revision of the dissertation, the student should work closely with the advisor to address all of the issues before calling another committee meeting.

Dissertations cannot go to orals without the assent of all committee members and the Program Director. There may be situations where one member of a committee disagrees with the majority of the committee as to whether a draft is appropriate for defense. If the disagreement cannot be reconciled after extensive discussion, and the faculty member strongly disagrees over the quality of the dissertation, it is appropriate for the faculty member to resign from the committee. The dissertation cannot then proceed to orals unless and until the student secures agreement of another faculty member to join the committee. Appointing additional committee members follows the same procedures as original appointment of the committee.
5. **In preparation for the defense**

The student must provide a copy of the dissertation to the Program Director, the Department Chair to make available to the faculty to read before the oral defense. These copies must be available at least two weeks before the scheduled oral defense. A copy of the dissertation must be placed on file with the Johnson Center Library when the defense is scheduled.

The oral defense should be scheduled through the Graduate Programs Assistant who informs the Graduate Dean of the student's name, the title of the dissertation, the date and location of the oral defense *at least three weeks before the projected defense date*. When scheduling the defense, contact Sara Montiel ([smonteil@gmu.edu](mailto:smonteil@gmu.edu)) for a room reservation. Once a room reservation has been secured, forward the following information onto the Graduate Programs Assistant, Darby Wiggins ([dwiggin3@gmu.edu](mailto:dwiggin3@gmu.edu)) for scheduling:

1. Your full name
2. Date of defense
3. Location – Building and room number
4. Beginning and end time of defense
5. Dissertation committee members names – please indicate who is Chair.
6. Dissertation title
7. Abstract

Do *not* ask your Dissertation Committee Chair to schedule orals until your committee and the department chair have seen and approved your last draft. It is *very common* for several drafts of the dissertation to be required prior to scheduling your defense and, if all goes well, at least one revision after orals. The dissertation represents the culmination of your program and an important contribution to the body of psychological knowledge. It is the faculty’s responsibility to the field and to you that the final product meets a high standard.
XV. THE DISSERTATION

The Doctoral Supervisory Committee guides the student in the preparation of the dissertation. Specific guidelines may be found in the Dissertation and Thesis Web Guide. The University library manages this guide and the guide can be found at http://thesis.gmu.edu

A student is required to enroll in PSYC 999 - Dissertation for a total of six (6) credit hours. A total of twelve (12) hours of PSYC 998 and 999 is required for the doctoral degree.

Once a student begins enrolling in 998, he/she are not required to maintain enrollment in during the fall and spring semesters until he/she has defended the dissertation. Once a student begins taking 999, he/she is required to maintain continued enrollment until he/she has graduated.

Students are required to enroll in 3 credits of dissertation in the term immediately preceding the one in which they submitted their Dissertation Proposal Cover Sheet to the Dean’s Office. In each subsequent semester thereafter, students are required to enroll in at least 3 credits of dissertation until they have completed the minimum 12 hours combined. Only after completing the minimum combined 12 hours of dissertation, may a student enroll in 1 credit of dissertation per term. During this period, the University will only certify you as having part-time enrollment status if you are enrolled in 4.5 credits. Full-time status is awarded when a student is registered for 9 credits or 6 credits with a 20-hour teaching assistantship. Students are strongly encouraged to discuss their proposal and dissertation credit plans with their advisors.

Students at the ABD stage are strongly advised not to seek full-time off-campus employment. This often jeopardizes attainment of the degree and, at the very least, disrupts its timely completion. Please discuss with your dissertation advisor these issues prior to seeking full-time employment.

Oral Defense of the Dissertation

Policy on Dissertation Defenses

Summary: The dissertation and its oral defense represent the final demonstration that a doctoral candidate has sufficiently mastered the methods and content of the discipline, that he/she can plan a substantive research project, collect, analyze, and interpret the data, and fit the findings into literature in the area. Students must demonstrate a sufficient mastery of the discipline that they can accomplish this task, report the dissertation work in clear technical writing in appropriate format, and defend orally what they have done in each phase of the work.

Prior to the defense: No dissertation can proceed to a defense until each member of the committee and the department chair have signed the “permission to defend” form, signifying that each has individually read the dissertation draft and has concluded that it is in final form except
for minor changes. This does NOT preclude the committee from stipulating changes (possibly major ones) as a result of the issues raised in the oral examination.

**Procedure for the oral defense:** The candidate and the examining committee must be present at the defense. An observer from the Dean's office may be present. Other members of the university community are welcome to attend the defense as observers. Attendance by persons who are not members of the university community (e.g., family members) is not normally allowed.

The defense is chaired by the advisor, who is responsible for maintaining appropriate professional decorum. The advisor will open the meeting by reviewing procedures to be followed. Although exact procedures will vary depending upon the wishes of the dissertation committee, the procedure will normally open with a presentation of the dissertation work by the candidate. During and following this presentation, the candidate is examined for thorough mastery of the methods, analysis, and interpretation of the data, and its context in the literature; only members of the examining committee may participate in this examination. If other persons present at the examination wish to question the candidate, they may do so only with the permission of the dissertation chair.

After conclusion of the examination, the candidate and others present are then asked to leave the room while the examining committee deliberates; the dean's representative is invited to observe the deliberations. After deliberations, a vote is taken, and the candidate is then brought back into the room and privately informed of the decision of the committee.

**The following are appropriate requirements for the oral defense:**

1. The student is expected to have mastered the research process as it relates to his/her dissertation, and to have command of the subject matter of the dissertation. The student should be able to answer procedural questions concerning data collection or statistical analysis procedures. For the latter, it is not expected that the student have each formula at his/her fingertips, but that the data analysis be explained conceptually, that it is clear that the student understands the analysis, and that the student be able to demonstrate that the assumptions of the analysis performed were reasonably valid.

2. If the data analysis has been altered since proposal approval, the student should be able to justify changes. If the faculty feel that alterations should have been made, the student should be able to explain why no alteration was made. This must be kept reasonable. For example, a student who has conducted a two-group study with a single dependent measure is not liable to questions concerning multivariate analysis. However, completion of the mechanics of data analysis is not a substitute for thoughtful data analysis, and an understanding of the limitations of analysis.

3. The student must be able to explain how interpretations were derived from the analysis of the data, and how his/her findings fit into and contribute to the existing body of literature in the area.
4. The student must be able to evaluate the strengths and weaknesses of his/her own work, and to project logical extensions of that work.

The dissertation committee is the ultimate judge of whether the student satisfactorily performs the requirements of the oral defense. Decisions of the committee may be either (1) pass, with no changes: the student has completely satisfied the committee, and no changes are required to the dissertations, (2) pass, with changes: the student has satisfied the committee, but stipulated changes must be made to the dissertation before submission, or (3) fail: the committee is not satisfied with the student's ability to perform the above, and/or such major changes are required in the written dissertation that another exam must be scheduled. In order to pass the exam, all members of the dissertation committee must vote to pass the candidate. All decisions of the committee on whether the candidate passes or not, and what changes are required to the written dissertation, are made in a closed meeting of the examining committee immediately following the oral exam; other persons present at the examination may not be present at or take part in the discussion leading to the vote (except that the dean's representative is invited to observe the deliberations).

If a candidate does not pass the oral examination, he/she is allowed a maximum of one additional oral examination; to be scheduled only after the committee is satisfied that stipulated changes in the written dissertation have been made.

If the student passes with no changes, the committee will sign the cover sheet, and the student will have completed all requirements for the degree. If the student passes with changes, the committee may either sign the cover sheet and entrust the advisor to revise the changes before submission of the dissertation, or may require that the candidate circulate the final draft to the committee before signature. Students who pass with changes have not completed all requirements for the degree; they should not use the title “doctor” until the dissertation has been signed and turned in to the university.

Students who complete their dissertation after the filing deadline for the semester will receive their degree at the next graduation opportunity. However, as soon as all graduation requirements are met, the university will provide a letter stating that all doctoral requirements have been met and that the degree will be awarded at the next opportunity.

**Format Review**

The library conducts the review for formatting of all dissertations. Students will submit completed dissertations directly to the library and hand all the requisite paperwork (for University Microfilms International and the National Opinion Research Center). For additional information contact Sarah Patton, University Dissertations and Theses Coordinator. She can be reached at (703) 993-2222, spatton@gmu.edu, or http://thesis.gmu.edu
XVI. FLEISHMAN DISSERTATION AWARD

Students conducting a dissertation under the supervision of a faculty person in the I/O and HFAC Areas are eligible for this dissertation award.

The Edwin A. Fleishman Dissertation Award is given to the best paper based on a Ph.D. dissertation completed at George Mason University by a student in the Industrial/Organizational and Human Factors and Applied Cognition Areas of the Department of Psychology. It is given in honor of Edwin A. Fleishman, Emeritus Distinguished University Professor, who, throughout his career, has made exemplary contributions to many areas of Applied Psychology, including human abilities measurement, leadership, and the promotion of Applied Psychology around the world.

How to submit entries for the Fleishman Dissertation Award:

a. Entries may be submitted only by students who have obtained their PhD while at GMU in Psychology and whose dissertation has been accepted by the university within the previous 24 months of the annual submission deadline for the award. A given entry can be submitted only once.

b. Submissions will take the form of a manuscript based on the dissertation. The manuscript should be prepared in APA format and should be the version submitted to a journal. If the manuscript has not yet been submitted to a journal, the manuscript is limited in length to a maximum of 30 double spaced pages (excluding tables and figures). Applicants should submit 5 copies of the paper for consideration or one electronic copy.

c. Submissions should be accompanied by a letter from the dissertation advisor supporting the nomination. The letter should specify the date of acceptance of the dissertation and that the submission adequately represents all aspects of the completed dissertation. Note that this letter need not comment extensively on the quality of the project as the actual evaluation for the award will be based on a critical review of a paper submitted by the recent graduate.

Bases for evaluation:

a. A committee consisting of two faculty members who are actively involved in the A-E area graduate programs will be created in order to evaluate the papers submitted for the award. The committee will be constructed so that no student submitting a proposal would have his or her advisor on the committee that year.

b. The criteria for evaluation will include dimensions of technical merit (e.g. internal validity, appropriate use of methods), writing style, theoretical and practical relevance, and significance. Additional consideration will be given to a study that serves to highlight the particular research strengths of the I/O and HFAC Areas at GMU.
c. In the event of a fair number of high quality submissions, the evaluation committee will rank order the papers in terms of merit. This would allow for the possibility of an “honorable mention” award. The committee also has the right not to make an award during a particular review cycle.

d. Award winners will be announced in time for a formal ceremony at the end of the academic year during which a certificate of recognition would be given to the student to honor his or her achievement.

Any questions regarding this award should be communicated to either Dr. Stephen Zaccar, Award Chair, George Mason University Psychology Department.
XVII. RESEARCH PROJECTS

The HFAC Faculty encourages doctoral students to engage in research using any one of several approaches. When a student has determined his/her area of research interest, the student may become involved in research projects in that area in several ways. The student may find a faculty member who is interested in working with the student and enroll in PSYC 897. The student may find a faculty member who has a grant or contract in a research area of interest to the student and approach this faculty member expressing interest in the project. The student may know of a professional who is off-campus with whom the student would like to work on a research project. In this case, the student should discuss this with her/his advisor to determine how this could be arranged to the student's advantage. For example, a practicum placement might be developed for the student.

Approval of Research Projects

All research projects must be approved by the faculty advisor before the research begins. Research projects or experiments done under the supervision of faculty require approval but the procedure is somewhat different for master’s theses and doctoral dissertations. If a project involves the use of human subjects, the project must be approved by the University Human Subjects Review Board (703) 993-2292. The appropriate university procedure and forms are available in the Office of Sponsored Programs of on the web at http://www.gmu.edu/research/ORSP/HumanSubjects.html

Research Space

Normally a faculty member in the department is in charge of allotting research space. When you have determined your research space needs, contact your advisor and your advisor will attempt to get space for you. Research space is at a premium at the university, and early requests will help insure that your needs are met.

Computer Facilities

The university has numerous terminals about campus and in the department that access the GMU mainframe computers. You may contact University Computing (3-8870).

The university also has number of laboratories located in various campus locations that house both Macs and Windows computers for student use.
XVIII. HUMAN FACTORS AND APPLIED COGNITION FACULTY

The Department has 40 full-time faculty in the areas of clinical, developmental, experimental, human factors and applied cognition, industrial/organizational, and social psychology. Only the faculty involved in the HFAC Program are listed here.

Human Factors and Applied Cognition Faculty

**Carryl L. Baldwin**, Ph.D., University of South Dakota, Assistant Professor: auditory cognition, surface and air transportation, aging, cognitive neuroscience

**Deborah A. Boehm-Davis**, Ph.D., University of California at Berkeley, Professor and Department Chair: human-computer interaction, transportation (aviation & highway), interruptions, cognitive workload

**Pamela Greenwood**, Ph.D., SUNY Stony Brook, Research Associate Professor: cognitive aging and Alzheimer's disease, genetics of cognitive aging and Alzheimer's disease, visuospatial attention, working memory, the relation of attention to working memory

**Maria Kozhevnikov**, Ph.D., University of California, Santa Barbara, Associate Professor: visuospatial imagery, individual differences in cognitive style, spatial navigation performance, virtual environments

**Christopher A. Monk**, Ph.D., George Mason University, Assistant Professor and HFAC MA Program Coordinator: driver cognition, interrupted task performance, highway safety, usability, human-computer interaction

**Raja Parasuraman**, Ph.D., University of Aston, Birmingham, U.K., University Professor and HFAC Program Coordinator: attention, human-automation interaction, robotics, neuroergonomics, cognitive neuroscience, aging

**James Thompson**, Ph.D., University of Swinburne, Assistant Professor: cognitive neuroscience, biological motion, robotics

HFAC Affiliated Faculty

**Patrick E. McKnight**, Ph.D., University of Arizona, Assistant Professor: measurement, data analysis, decision-making, health services research

**James F. Sanford**, Ph.D., Kansas State University, Associate Professor: human learning and memory and cognition
J. Gregory Trafton, Ph.D., Princeton University, Adjunct Professor: complex cognition, interruptions and resumptions, complex visualizations, scientific reasoning, human-robot interaction

Emeritus Faculty

John Allen, Ph.D North Carolina State University. Professor Emeritus

Edwin A. Fleishman, Ph.D., Ohio State University, Distinguished University Professor Emeritus; University of Edinburgh (Honorary Doctor of Science): industrial/organizational and human factors psychology, taxonomies, human performance

Robert W. Holt, Ph.D., University of Illinois, Associate Professor: artificial intelligence, group processes, social development
XVIII. THE UNIVERSITY

At George Mason, all full-time faculty are members of the Graduate Faculty. Their primary responsibility is to enact the policies mandated by the Graduate Faculty (through the Graduate Council) and to maintain quality control on all graduate degrees awarded at George Mason.

The Graduate Council makes all policies regarding graduate matters of the College of Humanities and Social Sciences (CHSS) at George Mason, approves all courses, and awards all degrees. These policies are implemented by the Deans of each academic unit. The Psychology Department reports to the Dean of the College of Humanities and Social Sciences. Thus, it is the Dean, who accepts students into programs, monitors their progress, and finally awards the doctoral degree. Department policies and procedures are subject to approval by the Graduate Council and implemented by the Deans.

All students are advised to read the Catalog carefully and recognize that all graduate programs are governed by university policy.

The following are some guidelines that the University wishes students to know:

CANDIDACY - The student completes all examinations and other requirements for advancement to candidacy. The department notifies the appropriate Dean in writing that a student is ready for advancement to candidacy. The Dean formally notifies the student of advancement to candidacy. The student has five years (5) to complete the dissertation after being advanced to candidacy.

COMMITTEE - Student and advisor discuss dissertation topic and selection of committee. Department Chair nominates the major advisor and committee members. The appropriate Dean appoints the committee.

PROPOSAL - Student develops dissertation proposal. Committee approves proposal. Signed copy of signature sheet sent to the College of Humanities and Social Sciences.

DISSERTATION FORMAT REVIEW – Student should bring Theses and Dissertations to Sarah Patton (Special Collections, Fenwick Library, Room C201) for format review. Contact Sarah at 993-2222 or spatton@gmu.edu

DISSERTATION - Student can register for dissertation credits after the appropriate Dean receives sheet. Student follows format guidelines in Thesis and Dissertation Guide (available in University copy centers); clears format with the College of Humanities and Social Sciences. Committee and Chair determine that student is ready for dissertation defense. Working copies (bound or boxed) filed both with the College and at Library Reserve desk at least two weeks prior to date of scheduled defense.
DEFENSE - Department notifies the College of scheduled defense in poster/flyer format (at least two weeks in advance of defense). The College sends out notice to GMU community. Defense takes place. If successful, all members of committee and chair sign both dissertation cover sheets (two copies). If unsuccessful, the dissertation is re-worked and a new defense is scheduled. Two finished copies meeting University format specifications with original cover sheets are sent to the appropriate Dean for signature. Members of the dissertation committee should be provided with a bound copy of the finished document.

BINDING - The College transmits dissertation to Library. Library will have both copies bound, then placed on permanent reference. Student may reclaim working copies from the College and Library.
XIX. DEPARTMENTAL FACULTY RESEARCH INTERESTS

APPLIED DEVELOPMENTAL

Tim Curby 993-2457 / DK 2048
Classrooms as a context for children’s behavior and development; Teacher-child interactions; Classroom quality; Development of classroom observational measures; Quantitative methods.

Susanne Denham 993-1378 / DK 1024A
Director, Applied Developmental Program
Preschoolers’ social-emotional development and its assessment and promotion; Peer competence in preschool and elementary school; Developmental psychopathology; Parenting: Its impact on the above

Kimberly Eby 993-8671 / JC 241
Violence and gender; faculty roles in Interdisciplinary collaborative work; collaborative learning; teaching and learning strategies across the disciplines; responding to the needs of domestic violence survivors.

Elyse Lehman
Faculty Emeritus. Memory, attention, and problem solving in children and older adults; Educational applications-Learning disabilities, gifted children, attention deficit disorder; Everyday cognition-Children’s art, soft object attachments; Eyewitness testimony

Robert Pasnak 993-1354 / DK 2049
Cognitive and socioemotional development in preschool, elementary school, and special education children

Koraly Perez-Edgar 993-9366 / DK 2050
Attentional Control and Attentional Biases, Anxiety, Social Reticence/Shyness, Temperament, Biological substrates

Johannes Rojahn 993-4241 / DEM 202
Intellectual and developmental disabilities, autism (Socio-emotional competence, mental health/illness, psychopathology, self-injurious, stereotypic and aggressive behaviors; applied behavior analysis; assessment)
Adam Winsler 993-1881 / DK 2023  Development of self-regulation; Private speech; Bilingualism; ADHD; Early childhood education; School readiness among low-income, ethnically diverse children

**BIOPSYCHOLOGY PROGRAM**

Linda Chrosniak 993-4139 / DK 2045  
**Director, Honors Program in Psychology**  Research interests include implicit and explicit memory processes, and relationships between stress, cognition and health. In addition, in collaboration with Dr. Flinn, she has investigated effects of trace metals (zinc, copper and iron) on memory processes.

Jane Flinn 993-4107 / DK 2022  The role of metals in learning and memory and in Alzheimer’s disease

Craig G. McDonald 993-2277 / DK 2018  Psychophysiology of visual perception and cognition; Drug-induced neuroplasticity; Pavlovian conditioning and addiction

Robert F. Smith 993-4339 / DK 2044  
**Director, Biopsychology Program**  Developmental neuroscience, esp. effects of drugs [currently, nicotine] on adolescent neurobehavioral development. Activity-dependent dendritic growth. Animal models of addiction.

**CLINICAL**

Lauren Cattaneo 993-4728 / DK 2021  Community and institutional responses to intimate partner violence, helpseeking, risk assessment and empowerment.

Christy Esposito-Smythers 993-2039 / DK 2061  Assessment, prevention, and treatment of adolescent suicide, depression, and substance abuse.

**Deborah Boehm-Davis**  
*Department Chairperson*

Applied cognition; understanding interruptions and cognitive workload; transportation (Aviation and highway)

**C. Alan Boneau**

Faculty Emeritus. Recognition memory and imagery; Structure of psychology; Psychophysics

**Robert Holt**

Faculty Emeritus. Social cognition; Pilot cognition; Programmer cognition; Artificial intelligence; Computer assisted instruction; Computer adaptive testing; Relation of physiological measures to cognition

**Maria Kozhevnikov**  

Neural mechanisms of mental imagery; individual differences in basic information processing capacities; cognitive styles; spatial navigation; design learning technologies to accommodate individual differences and learning styles.

**Chris Monk**  
*Coordinator, Human Factors/Applied Cognition M.A. Program*

Driver cognition, driver performance with in-vehicle devices, human-computer interaction, transportation safety, and interrupted task performance.

**Raja Parasuraman**  
*Director, Human Factors/Applied Cognition Program*

Matt Peterson 993-4255 / DK 2058
Cognitive neuroscience of attention, memory, and perception. Visual attention, visual search, and eye movements. Attentional control and multitasking

James Sanford 993-1351 / DK 2046
Associate Chair for Undergraduate Studies
Human memory and cognition, false memory, testing effect

Jim Thompson 993-1342 / DK 2056
Cognitive neuroscience, including fMRI and ERPs; biological motion; social cognition; robotics.

INDUSTRIAL/ORGANIZATIONAL

Louis Buffardi 993-1362 / DK 3072
Coordinator, Industrial/Organizational M.A. Program
Employee attitudes; Quality of work life organizational surveys; Work and family issues; Human error

Jose Cortina 993-1347 / DK 3074
Associate Chair for Graduate Studies
Statistical interaction; Philosophy of quantitative analysis; Personality testing

Reeshad Dalal 993-9487 / DK 3077
Employee performance, and its links with mood/emotions, job attitudes and individual differences, and advice-giving and advice-taking from a decision-making perspective.

Theodore Gessner
Faculty Emeritus. Evaluation research; Survey research; Person perception; Humor
Seth Kaplan                993-8475 / DK 3073 Personality, emotions, and well-being at work. Understanding the meaning and the psychological experience of work. Psychometric and statistical issues.

Eden King                   993-1620 / DK 3076 Effective and equitable management of diversity in organizations, discrimination, social stigma in the context of work.

Lois Tetr...
behaviors; applied behavior analysis; assessment)

Ellen Rowe 993-4266 / DEM 202C

Assessment and remediation of social, emotional, and behavioral problems among children and adolescents and developmental psychopathology.
APPENDICES

Graduate Student Resources

Information for students on University and Colleges policies, registration services, financial aid, supportive services, thesis/dissertation policy and graduation can be found on the Graduate Student Information webpage. Additionally, Program Handbooks, Programs of Study (POS), commonly used forms as well as other useful resources can be located here. Students are encouraged to bookmark this link and visit if often.

http://psychology.gmu.edu/Graduate%20Student%20Resources/GradPsycResources.html

Course Descriptions

Course descriptions appear in the University Catalog

http://catalog.gmu.edu/content.php?catoid=5&navoid=99

Syllabi for some courses can be found on the Department of Psychology’s website (http://psychology.gmu.edu/Courses%20and%20Syllabi.html) Syllabi also are on file in the Department of Psychology Undergraduate Office.
Teaching Opportunities
Teaching Assistantship Descriptions and Qualifications

Please note that the indicated workload is an estimate and is based on the university standards. Actual workload, especially the first time in an assignment, will usually be greater.

PSYC 100  Introductory Psychology (two 10 hr appts).
Qualifications: Admission to graduate program.
Responsibilities: (10 hr appt). Assist instructor for two or three large lecture sections; construct/administer/grade exams, keep records.

PSYC 300  Statistics (six-eight 10 hr appts).
Qualifications: B+ or better in PSYC 611/612
Responsibilities: (10 hr appt) each two 2 hr labs - research design, APA format; conducting/writing up labs; extensive grading of papers.

PSYC 304  Principles of Learning (one 15 hr appt).
Qualifications: B+ or better in PSYC 611/612 + 701
Responsibilities: (15 hr appt) teach two 2 hr labs - research design; conducting/writing up labs demo labs; some grading of papers.

PSYC 305  Memory and Cognition (six 10 hr appts).
Qualifications: B+ or better in PSYC 611/612
Responsibilities: (10 hr appt) teach two 2 hr labs - research design, APA format; conducting/writing up labs; extensive grading or papers.

PSYC 309  Perception (one 15 hr appt - spring).
Qualifications: B+ or better in PSYC 611/612 + 766
Responsibilities: (15 hr appt) teach two 2 hr labs – research design; conducting/writing up labs, demo labs; some grading of papers.

PSYC 320  Tests and measurements (one 10 hr appt - spring).
Qualifications: B+ or better in graduate testing course
Responsibilities: (10 hr appt) teach two 2 hr labs - demonstration of tests, grading, working problems, quizzes, etc.

PSYC 323  Clinical and Social Research Techniques (one 15 hr appt - fall).
Qualifications: B+ or better in PSYC 703 and one of 650 or 612
Responsibilities: (15 hr appt) teach two 2 hr labs - teach research design; conducting/writing up labs, demo labs; grade papers.

PSYC 373  Physiological Psychology (one 15 hr appt).
Qualifications: B+ or better in PSYC 702
Responsibilities: (15 hr appt) teach two 2 hr labs - neuroanatomy of sheep, human research techniques; administer grade quizzes, paper.
PSYC 611 & 612  Quantitative Methods I & II (one 20 hr appt).
Qualifications: A in PSYC 611/612
Responsibilities: (20 hr appt) teach two 2 hr lab – computer use; use of statistical packages, calculator work; matching design to type of statistical test; interpretation of data analysis.

PSYC 709  Measurement of Intelligence (one 10 hr appt - fall)
Qualifications: A in PSYC 790
Responsibilities: teach lab.

PSYC 710  Personality Assessment (one 10 hr appt - spring)
Qualifications: A in PSYC 710
Responsibilities: teach lab.

PSYC 722  Advanced Child Assessment (one 10 hr appt - fall)
Qualifications: A in PSYC 722
Responsibilities: teach lab.

PSYC 750  School Practicum (one 10 hr appt - spring)
Qualifications: A in PSYC 750
Responsibilities: teach assessment testing.

PSYC 810 & 811  Measurement of Intelligence and Personality Assessment (two 10 hr appt)
Qualifications: A in PSYC 810/811
Responsibilities: (10 hr appt) teach lab work in assessment.
Teaching Undergraduate Courses

Graduate students are often hired as Instructors of undergraduate courses. Qualifications for these positions are: B+ or better in corresponding graduate course; at least 18 hours graduate coursework completed. Responsibilities for a 10 hour appointment: Teach one 3 hour course; responsibility for all lectures/exams/student help/office hours, etc.

All graduate students who wish to teach must take the Summer Teaching Mentoring course taught by Dr. Smith.

Guidelines for Dissertation, Thesis and Travel Support
July 2009

Dissertation and Thesis Support

The department will provide up to $400 to help cover the cost of dissertation research and up to $250 to cover the cost of master’s thesis research. These funds are to be used to assist in the collection of data, including payment to participants if the research requires a population not readily available at the University. All equipment, books, software, tests, etc that are purchased with department funds becomes the property of the department. These funds are provided in the form of reimbursements for expenses, not cash grants or up-front money paid to vendors. Therefore, keep good records of your expenses, including all receipts. Only original receipts (not photocopies) will be accepted.

Requests should be submitted to the Associate Chair for Graduate Studies. To apply, you must provide:

1. A copy of the signature sheet of your approved dissertation or thesis proposal.
2. A budget that specifies how you plan to spend the money.
   -The budget must be signed by your advisor.
   -If the budget includes copying, office supplies, postage, and other such items that can be purchased by or through the department, the budget must be reviewed and initialed by Susan Ridley prior to submission.
3. A statement from your advisor that he/she does not have funds to support this research (e.g., from a grant).
4. Students may apply for thesis/dissertation support or travel support but not both.

Travel Support

The department will provide up to $300 to doctoral students to help pay for travel to a conference at which the student is presenting. To be eligible, the student must be either first author of the paper/poster or second author if the first author is a faculty member. Ordinarily only one such request per year will be approved. The department will help pay for airfare and conference registration but not lodging, meals, taxis, etc.

Requests should be submitted to the Associate Chair for Graduate Studies. To apply, you must provide:

1. A letter from the conference indicating that your paper, poster, etc. has been accepted.
2. A budget describing how you plan to spend the money, including the exact cost of the airfare and/or conference registration fee.
3. Evidence that you have at least attempted to get money from other sources, including the organization sponsoring the conferences (some but not all offer support for students presenting), your advisor’s grant, the University’s graduate student organization (student may apply for Graduate Student Umbrella funds and department funds simultaneous but
must provide evidence of GSU award or refusal before department funds will be awarded (www.gmu.edu/org/gstf/GSTF.html). Evidence of an attempt to get money from the University’s graduate student organization is required.

4. All of the above must be submitted at least two months prior to the date of travel.

5. Students may apply for thesis/dissertation support or travel support but not both.

Following approval of your request for funds, you must immediately complete a Travel Authorization Form, which must be signed by the Chair before travel arrangements can be made. No travel expenses will be reimbursed unless the Travel Authorization Form has been signed by the Chair prior to the travel.

Reimbursement request worksheets (obtained in DK 2003) with original receipts (not photocopies) must be submitted within one week of completion of travel. Nametags cannot be submitted in place of a conference registration receipt. You may make your own travel arrangement. You must submit a boarding pass with your airline ticket receipt. Dates of travel and cost must be on the ticket receipt. Travel authorizations can be found by contacting the Office Manager.

**DBSPO Travel Grants**
The Developmental/Biopsychology/School Psychology student organization (DBSPO) has created/facilitated methods to obtain travel funds, as well, as follows:

**SIN Travel Grants**
Each year SIN sponsors students to go to Neuroscience. This year SIN sponsored 11 students to go! If you are interested. Dr. Flinn is the faculty advisor.

**The Graduate Student Travel Fund**

**Mission Statement**
The Graduate Student Travel Fund was established to help George Mason University graduate students attend and participate in professional conferences pertaining to their field of study. Conference travel plays an essential role in the academic growth and development of graduate students by providing opportunities for training, networking and exposure to the latest academic research. Support for conference travel from the GSTF also provides an opportunity for George Mason University degree seeking graduate students to present their work in a professional academic setting. This type of participation helps promote the graduate programs available at Mason on the regional, national and international levels, and aids in the process of attracting outstanding scholars to Mason to pursue their graduate degrees.

**The Scope and Purpose of the Graduate Student Fund**
The GSTF is charged with the responsibility of administering funds received from the Office of the Provost and student fee funds allocated by the Student Funding Board (SFB). The application standards utilized by the GSTF are designed to evaluate requests in a fair and unbiased manner, providing equal opportunity for all Mason graduate students. The GSTF as it
currently exists provides financial support for conference travel only. At this time, requests for dissertation support or job interview travel cannot be honored as these types of requests fall beyond the scope of the GSTF. The GSTF was established to help supplement conference related expenses; it is not meant to fund your entire conference. Award amounts vary depending on conference location and type of participation, award amounts range from $150.00-$250.00 this amount is subject to change at any time.

For specific policies and requirements, visit their webpage at:  
http://www2.gmu.edu/org/gstf/ 

**Psychology Department Travel Funding**

- Travel support is available only to doctoral students who plan to travel to a professional or scientific meeting or convention for the purpose of presenting research or other scholarly or professional product for which the student had the primary role or a major role in designing and implementing (e.g. if you are fourth author on a Poster presentation, we are unlikely to give you money).
- Travel awards will typically be limited to $300, but exceptions will be made under special circumstances.
- This money is to be used for travel expenses (i.e., getting to and from the meeting) and/or convention registration, but NOT for lodging and/or for meals. If the meeting takes place in the Washington area, we will only pay for registration.
- Students requesting travel support must provide evidence that the paper or poster has been accepted at the meeting.
- Students must also provide evidence that they have sought or are seeking other sources of travel support such as a faculty grant or contract, the organization sponsoring the meeting (many have student travel funds), and GMU’s Graduate Student Travel Fund. The department is the place of last resort for travel funds, not first resort.
- A student who accepts money must keep all receipts of expenditures and turn them in to the department (the same we ask of faculty).
- The student agrees to take part in at least one session of the GMU Phonathon.

**How to apply:**

Submit the following information to the Department budget staff:

1. A letter from the conference indicating that your paper, poster, etc. has been accepted.
2. A budget describing how you plan to spend the money, including the exact cost of the airfare and/or conference registration fee.
3. Evidence that you have at least attempted to get money from other sources, including the organization sponsoring the conference (some but not all offer support for students presenting), your advisor’s grant, the University’s graduate student organization (student may apply for Graduate Student Umbrella and department funds simultaneous but must provide evidence of GSU award or refusal before department funds will be awarded.
(http://www.gmu.edu/org/gstf/GSTF.html). Evidence of an attempt to get money from the University’s graduate student organization is required.

4. All of the above must be submitted at least two months prior to the date of travel

Following the approval of your request for funds, you must immediately complete a Travel Authorization Form, which must be signed by the Chair before the travel arrangements can be made. No travel expenses will be reimbursed unless the Travel Authorization Form has been signed by the Chair prior to the travel.
Guidelines for Graduate Student Grievances Against Faculty

February 7, 1996

During the course of graduate study, disagreement and conflict may arise between students and faculty either during formal classroom instruction or in the more informal individual instruction that takes place during the supervision of research and practica experiences. Indeed, the nature of the close working relationships inherent in graduate education in psychology, especially in a program with an applied focus, almost guarantees that conflict will arise on occasion.

When such conflict does arise, the Department expects that both the student(s) and faculty involved will conduct themselves in a professional manner. In addition, the Department is committed to ensuring that students and faculty are treated fairly when such disagreements arise. To this end, the Department endorses the following principles and guidelines for resolving disagreements and conflicts between students and faculty regarding instruction, training, and student-faculty relationships. (NOTE: Student concerns about faculty behavior that involves sexual harassment or racial/ethnic/gender discrimination should be handled according to the University guidelines provided in this manual.) The resolution of disagreement and grievances will be resolved more effectively if the following principles are kept in mind.

Faculty

1. The professional performance and behavior of faculty is subject to continual evaluation and review, including evaluation and review by students. Student evaluation may, on occasion, involve the resolution of a complaint by a student concerning faculty performance.

2. The Department expects faculty to treat a student's concerns with dignity and respect. Essential to this is listening to a student's concern attentively and nondefensively. Although defensiveness is difficult to avoid when one believes one is being unfairly criticized or challenged, nondefensive listening is the first step toward a successful resolution of a conflict. Nondefensive listening may be facilitated by recognition of the apprehension and anxiety a subordinate (the student) usually feels when confronting a person of power and authority.

Students

1. Faculty and students enter into an educational alliance whose objective is the imparting to students knowledge and skill. As part of this alliance, faculty are responsible for setting standards for mastery of this knowledge and skill and for evaluating students' progress toward meeting these standards. Students in professional psychology programs provide services to various types of clients (individuals and organizations), and faculty are ultimately responsibility for the quality of these services. Thus, faculty evaluation of student performance and progress provides assurance of the quality of these services.
2. Graduate education is, by nature, difficult, demanding, and stressful (If it wasn't, anyone could get a Ph.D). Thus, subjective distress alone is not a valid indicator that a course is inappropriately demanding or that a student is being treated unfairly by a faculty member.

3. In trying to fulfill their responsibility in setting standards and evaluating students' progress, faculty will, on occasion, make errors in judgment that are usually unintentional. Even for faculty, to err is human, and most student grievances concern faculty behavior that is nonmalevolent in intent. Nonetheless, when such errors create problems or hardships for students, they have the right to address their concerns with the faculty in question.

4. The ability to effectively address and resolve disagreement and conflict in a mature manner is essential for the effective functioning of a professional psychologist in any setting. Thus, disagreement and conflict with faculty offers an opportunity for personal and professional development.

5. Faculty also deserve to be treated with respect and dignity. Complaining about faculty behavior to one's Program Coordinator or the Department Chairperson is a serious matter and should not be done with malicious intent or simply to seek retribution for a perceived wrong or slight. Also, approaching a faculty member in an angry or hostile manner or complaining to others about the behavior of the faculty member is not an effective strategy for resolving conflict. Students also should be prepared to listen nondefensively to a faculty member's explanation of his/her side of the conflict.

6. The Department cannot guarantee that resolution of a complaint or conflict will be favorable to the student. Nor should faculty expect that the issue will be resolved in their favor simply based on their position as faculty. The Department does guarantee, however, that students and faculty will be fully heard, that their concerns will be treated with dignity, and that an honest attempt will be made to reach a reasonable solution.

7. A student who, in good faith and in keeping with the above principles and with the procedures outlined below, complains about faculty behavior will be protected from retribution by the faculty member in question and by other faculty to the extent that the university has control over faculty behavior. Retributive or vengeful behavior by faculty toward a student complainee will not be tolerated. The Department has no control, however, over a faculty member's emotions, and a faculty member may decide to sever a working relationship (e.g., dissertation supervision, collaborative research or writing project) with a student following a complaint that the faculty member views as frivolous, unfounded, or malicious. Faculty who do so will not necessarily be viewed as engaging in retributive behavior. If a faculty advisor terminates a working relationship with a student following a complaint by that student against that advisor, the Department will make a good faith effort to secure another advisor for that student. The Department cannot, however, force a faculty member to work with a student.
Grievance Procedures

With these caveats in mind, the Department recommends that a graduate student who has concerns about the professional behavior of a faculty member take the following steps in the following order. Following these procedures will better ensure that the grievance will be resolved expeditiously and fairly.

1. Discuss the problem with the faculty member in question. Many disagreements, disputes, and conflicts between faculty and students are the result of miscommunication or misinformation and can be resolved informally between the concerned parties.

Consultation with the academic advisor usually will be helpful in determining whether or not a grievance is legitimate and in developing an effective strategy for presenting the concern to the faculty member in question. If a student cannot discuss the concern with his/her advisor, the student should consult another faculty member. The goal of such a consultation is to seek advice, not to spread rumor or simply complain. The faculty with whom the student consults concerning the grievance incurs certain responsibilities by agreeing to serve in this capacity: (1) To review with the student the Departmental policy and procedures described here. (2) To assist the student in determining the legitimacy of his/her concern and in developing a plan for discussing the concern with the faculty in question. In addition, the advisor may also choose a more active role in the resolution of the grievance by serving as the student's advocate or as a mediator. If the advisor/advocate believes that the faculty member in question has committed an illegal act or ethical violation, he/she should consult the Ethical Guidelines of the American Psychological Association for further consultation.

2. If the discussion with the faculty member with whom the student has a concern does not produce a fair resolution, the student should consult with his/her advisor (or other advising faculty) about the feasibility of bringing the matter to the attention of the student's Program Coordinator.

3. If consultation with the Program Coordinator does not produce a fair resolution, the student should consult with his/her advisor (or other advising faculty) about the feasibility of bringing the matter to the attention of the Associate Chairperson for Graduate Studies. The Associate Chairperson may appoint an ad hoc committee charged with working with the student and faculty member in resolving the grievance. This committee may include a graduate student as a member.

4. If consultation with the Associate Chairperson for Graduate Studies does not produce a satisfactory resolution, the student has the option of bringing the matter to the attention of the Department Chairperson.

5. If consultation with the Department Chairperson does not produce a satisfactory resolution, the student should consult with his/her advisor (or other advising faculty) about the feasibility of bringing the matter to the attention of the office of the Dean of the College of Humanities and Social Sciences.
