COURSE OBJECTIVES AND REQUIREMENTS:

Physiological psychology explores the biological, chemical, anatomical, and physiological aspects of the brain, demonstrating the integration of the fields of psychology and neuroscience. By course end, the student should be able to identify anatomical parts of the brain, and understand how physiological functioning relates to and influences human behavior.

PARTICIPATION: Class attendance will be taken in each class. Although not mandatory, regular class attendance (no more than 1 absences) can result in up to 1 point added to the final grade. Class attendance will be considered as participation in the course.
LECTURE: Lecture material will be taken from the assigned textbook. The student will be held responsible for all material discussed in class and the material contained in the text, unless otherwise noted by the instructor.
