Objectives: The lectures and readings in this course are designed to familiarize students with the fundamental relationships between the individual citizen, government, business and society. Philosophy, political theory, economic theory, and legal history are brought together to better understand public policy issues. The nature of state, firm and markets are explored in a contractual context. Also, the effects of government regulation in a wide variety of market settings are highlighted throughout the course from a "constitutional perspective."

Grades: There are two exams in this course, a mid-term and comprehensive final. There are also two required papers. The length requirement for each paper is as follows: paper 1 (5-7 pages), and paper 2 (approximately 15 pages). Grades follow a strict 90% and up = **A**; 80% to 89% = **B**; 70% to 79% = **C**; 60% to 69% = **D**; 59% and below = **F**. **THERE IS NO CURVE IN THIS COURSE.** The semester grade is weighted below:

Paper 1	15 %
Paper 2	20 %
Midterm	25 %
Final	40 %
* Project Option *	

Project Option: The project option is open to any student that desires to take 15% of the course weight off of their final exam. If the student chooses this option, their final exam is weighted only at 25% instead of 40%, and the project is worth 15%. The project includes a physical tour of both the National Archives and The Holocaust Museum in Washington D.C., and a written analysis

approximately 5-7 pages in length. Students electing this option should inform the instructor as soon as possible.

Texts: There are six books needed for successful completion of this course. These include:

Regulation, The Constitution, and the Economy by J. Edwards (JE)

Microeconomics: A Free Market Approach by Thomas Rustici, Nathan Snow and Carrie Milton (RSM)

Lost Rights by James Bovard (JB)

The Road To Serfdom by Friedrich von Hayek (FH)

The Anti-Capitalistic Mentality by Ludwig von Mises (LM)

Capitalism: The Unknown Ideal by Ayn Rand (AR)

There is one optional text suggested, **The State** by Anthony DeJasay which would be helpful for writing your first required paper. However, this book is not required. In addition, a copy of the **Microeconomics: A Free Market Approach** text will be placed on Reserve Desk at the Johnson Center Library for students to access. While students are not required to purchase this book, it is strongly encouraged that they access these readings since class lecture covers this material. In addition, some midterm exam and final exam questions will come directly from these readings. All remaining optional readings can be checked out at my office. Additional suggested books are also listed for each week but are available at the university Library.

Attendance

Regular attendance is absolutely crucial for successful completion of this course. A large portion of the test material comes from the class lecture. If for any reason regular attendance becomes difficult, inform me as soon as possible. Furthermore, I expect students to be on their best behavior while in class. This means no joking around, horseplay, excessive noise, eating or drinking etc. **Disruptive students will be removed from the class and receive an immediate "F" for the course.**

Honor

This course demands the highest standard of conduct. Cheating and plagiarism of any kind are **absolutely not tolerated**. Violation of this code results in an immediate failure for the course and a report to the GMU Honor Committee.

Additional Notes:

1. This class fulfills all or in part the writing-intensive requirement for the Economics major.
2. Total graded papers will exceed 3500 words.
3. Papers will be handed back within two weeks with my comments.

Paper Topic 1

Scene 1

You are walking down the street, and out from behind some bushes a mugger (Sam Slime) jumps out and threatens your life. He demands, "Your money or your life!" You give him your last \$50 in your wallet or purse. As Sam the mugger runs away, he turns the corner where a policeman crosses his path. You scream, "Stop that thief! He stole my money!" The policeman captures Sam the mugger. He is charged with stealing, convicted at trial, and sentenced to prison for his violent crime. Sam, our local mugger, is clearly recognized as a **criminal** and you are his **victim**.

Scene 2

Now suppose that same mugger changes tactics. Sam now votes for a politician who promises to raise your taxes \$50 to transfer it to the "disadvantaged" Sam Slime. Because he claims to be disadvantaged and in "need," both Sam and his political candidate claim he has an entitlement to the transfer of your income. Once elected, the politician introduces and passes legislation raising your taxes \$50 to give to his loyal supporter, voter Sam Slime. You protest by refusing to pay the new \$50 in taxes. The Internal Revenue Service (IRS) declares **you** a criminal. You resist Sam Slime's "mugging" of you through the political process. The police eventually come and round up you for tax evasion. **Now you are the criminal that goes to jail, and Sam Slime is your victim!**

Questions For Your Paper

Where does the commonality between these two situations break down, or, on the other hand, is there any difference? Is stealing through the political process any less morally reprehensible than stealing done individually? Finally, does regular political expropriation of another individual's income differ from slavery? Defend your answer using economic theory and ethical philosophy.
