Class: Thursday 4:30 - 7:10 pm  
Location: Buchanan Hall D180, Fairfax

Instructor: 
Daniel Houser  
Email: dhouser@gmu.edu  
Office Hour: Thursday after class or by appointment  
Office: Buchanan Hall D154, Fairfax  
Tel: 703-993-4856  
Website: [http://mason.gmu.edu/~dhouser/](http://mason.gmu.edu/~dhouser/)

Course Description

This class provides an introduction to the design and analysis of economics experiments. The topics covered will be useful to anybody interested in running scientific experiments, but will be primarily geared toward behavioral experiments as conducted by economists and psychologists.

Required:

Recommended:

Grades

Expect to work 15-20 hours per week on assignments for this course. Unless otherwise stated, all assignments are due at 11:55 pm, EST by the end of Thursday (see specific due day on Blackboard).
Homework (28%)

Six (6) Problem Sets and Eight (8) Reading Assignments will be handed out.

You need to submit your works on Blackboard before the due date. Refer to the course schedule and weekly overviews for details.

Presentation (12%)

You need to present one paper from the reading articles in the syllabus. Each presentation lasts for 10-12 minutes. You need to prepare a 8-12 pages slides for the presentation.

You have to register for your presentation [in this shared form](http://mason.gmu.edu/~dhouser/courses.htm). Please choose different paper from your classmates.

Midterm (25%) + Final Exam (35%)

The midterm will be on Week 8 (Oct 13) and it covers the first half of the course. The final exam will be on Week 15 (Dec 8). Both exams are in class-time.

Group discussion is not allowed. Late submissions will not be accepted. No make-up exams will be offered, if you miss the midterm with a valid excuse, its weight will be shifted to the final. Exams missed for unexcused reasons will receive a score of 0.

Outlines

Notes are available at Houser Website [http://mason.gmu.edu/~dhouser/courses.htm](http://mason.gmu.edu/~dhouser/courses.htm)

1. **Science and Experiments**
   - *Box, Hunter & Hunter, Chapter 1; Cox, Chapter 1; Houser website, Lecture 1*

2. **Review of Basic Statistics**
   - Probability distributions, parameters, statistics
   - *Box, Hunter & Hunter, Chapter 2; Houser website, Lecture 2*

3. **Comparing Two Entities**
   - a. Relevant reference sets and distributions
   - b. Randomized Paired Comparison Design
   - c. Blocking and Randomization
   - *Box, Hunter & Hunter, Chapter 3; Houser website, Lecture 3*

4. **Comparing k treatment means**
   - a. Completely Randomized Design - One-way ANOVA
   - b. Randomized Block Design - Two-way ANOVA
   - *Box, Hunter & Hunter, Chapter 4; Houser website, Lecture 4*
5. Designs with more than one blocking variable  
a. Latin squares  
b. Greaco and hyper-graecolatin squares  
c. Balanced incomplete block designs  
_Houser website, Lecture 5_  

6. Repeated Measures  
a. Introduction  
b. Standard ANOVA for repeated measures without order dependencies  
c. Comments on repeated measures designs that address order and sequencing effects  
_Houser website, Lecture 6_  

Reading Articles  

**Students with disabilities**

Students with Faculty Contact Sheets for this class need to present them to the instructor as soon as possible. Other students requiring reasonable accommodations, as covered under the Americans with Disabilities Act, should contact the Disability Resource Center (DRC) to open up a DRC file and discuss needed accommodations. Questions and requests for reasonable accommodations should be directed to DRC, 234 SUB I, phone (703) 993.2474 or email dwyne@gmu.edu.
Honor code

George Mason University is an honor code university. Students pledge not to cheat, lie, plagiarize or steal in academic matters.
