# PSYC 646 – Longitudinal Data Analysis Fall 2022

Tuesdays & Thursdays @ 9:00am Innovation Hall 317

Instructor:Timothy W. Curby, PhDEmail:tcurby@gmu.eduOffice Hours:After class Tuesdays and Thursdays 10:15-10:45Office:David King 2046

### **Course Description**

The purpose of this course is to train students to think deeply about techniques for measuring developmental change across lifespan. As such, we focus on sophisticated techniques for measuring change that can be used with repeated measures of individuals. Although many of the techniques are special cases of familiar statistical techniques (e.g., regression), many additional opportunities and considerations need to be explored in a focused, supported way. With this in mind, the course will introduce students to using Hierarchical Linear Modeling (HLM) and Structural Equation Modeling (SEM) to analyze longitudinal data.

### **Student Learning Objectives:**

- Analyze and interpret multi-level analyses
- Describe multi-level models from equations and convert research questions into equations
- Account for missing data through multiple imputation and full information maximum likelihood estimation
- Perform nested comparisons of SEM models
- Analyze and interpret transactional and growth SEM models
- Perform multigroup SEM analyses
- Apply learned statistical techniques to novel datasets

### **Textbook and Readings**

### **Course Requirements and Assignments**

1) **Attendance** (10%) You need to attend class if you are going to learn this material. An online link will often be available. However, this is for people who cannot attend class who make arrangements with me to attend online in advance.

2) **Exams** (40%) There will be two take-home exams. One will largely cover HLM and the other will cover SEM. The exams will be distributed in class and will be due (approximately) one week later as defined below. The exams are to be done individually with no outside help from another person.

3) Weekly Assignments (25%) There are going to be assignments of varying intensity and difficulty that require you to apply your knowledge of material from class to additional questions, data, et cetera. Some of these assignments will be directly related to the poster assignment.

4) **Poster** (25%) Students will analyze a longitudinal, repeated measures dataset from beginning to end and present it as a virtual poster at the end of the course. Students will need to choose a dataset, decide on research

questions, decide on a data analysis plan, implement data analyses, interpret the results, and summarize salient pieces into a poster. We will be using the newer poster format explained here: https://www.youtube.com/watch? v=1RwJbhkCA58

*Datasets for Poster*. Students should work to find a dataset for use in the course poster. The dataset needs to have at least three repeated-measures time points for individual people and already be in some kind of electronic form (i.e., database, spreadsheet, or statistical package file). Because of the depth of the work and the fact that the end result of this project may be eventually worthy of publication, students are encouraged to obtain a dataset with which they have some reasonable personal interest/commitment. Ultimately, the instructor needs to approve the use of the dataset. It is expected that multiple office meetings between students and the instructor will be needed in order to complete the assignment. Students are encouraged to talk to their advisor about the dataset and project. Other potential data sources are identified here: <a href="https://www.apa.org/science/about/psa/2018/06/publicly-available-data.aspx">https://www.apa.org/science/about/psa/2018/06/publicly-available-data.aspx</a>

# **Grading Scale**

Grades will be calculated as follows: > 93% = A, 90 - 92% = A-, 87 - 89% = B+, 83 - 86% = B, 80 - 82% = B-, 70 - 79% = C, 60 - 69% = D, < 60% = F

**Software & Computers.** Students will need to install R (<u>https://cloud.r-project.org/</u>), R Studio (<u>https://rstudio.com/</u>), and Onyx (<u>http://onyx.brandmaier.de/</u>). In addition, students should plan to have access to SPSS, if needed, through the Citrix Virtual Lab (<u>https://mymasonapps.gmu.edu/</u>). A VPN connection is needed (<u>https://its.gmu.edu/service/virtual-private-network-vpn/</u>) to access the Citrix Virtual Lab. If for any reason we need to meet synchronously, students will need access to Zoom (<u>gmu.zoom.us/signin</u>).

**Official Communications** via GMU E-mail: Mason uses electronic mail to provide official information to students. Students are responsible for the content of university communication sent to their mason e-mail account and are required to activate that account and check it regularly.

**Recordings** of the class should only be done with the expressed consent of the instructor and for personal use by the individual student. Any recordings should not be shared with anyone else. Other recording is not allowed. Class recordings are not a substitute for attending the class.

**Honor Code.** Students in this course are expected to behave at all times in a manner consistent with the GMU Honor System and Code. (<u>http://mason.gmu.edu/~montecin/plagiarism.htm</u>). Students are encouraged to study together as much as possible throughout the course, however, no assistance, sharing of information, or discussion of test items or answers between students may take place. For all work, the name that appears on the paper must be the author. Violations of the Honor Code will not be tolerated in this course and will be immediately reported according to GMU procedures. The instructor reserves the right to use software to determine the extent to which the work is the student's. The instructor for this course reserves the right to enter a failing grade to any student found guilty of an honor code violation.

Students may not reproduce (including uploading to the Internet) any portion of any test. Students who attempt to photograph or in any way capture information about tests for others' use will be reported for an honor violation, even if the violation happens after the end of the term.

**Deadlines** for adding and dropping classes are as follows:

Last Day to Add Classes- August 29 Drop Deadline with no tuition penalty- September 6 https://registrar.gmu.edu/calendars/fall\_2022/ **Classes may be canceled** by either the University or the Instructor (via email). In the event of a canceled class, the instructor will either switch to an online class modality, try to make up the material during other meetings of the class, or provide a supplementary assignment/video.

**Notice of mandatory reporting** of sexual assault, interpersonal violence, and stalking. As a faculty member, I am a designated a "Responsible Employee," and must report all disclosures of sexual assault, interpersonal violence, and stalking to Mason's Title IX Coordinator per University Policy 1412. If you wish to speak with someone confidentially, please contact one of Mason's confidential resources, such as Student Support and Advocacy Center (703-993-2380). You may seek assistance from Mason's Title IX Coordinator by calling 703-993-8730.

**Life is stressful and we all need a little support sometimes.** Students are encouraged to contact Counseling Services (364 Student Union I) at 993-2385 for assistance with any kind of psychological/life problem or crisis situation. I can help with referrals for students with particular counseling needs so please feel free to talk with me for help with anything.

**Disability Services** at George Mason University is committed to providing equitable access to learning opportunities for all students by upholding the laws that ensure equal treatment of people with disabilities. If you are seeking accommodations for this class, please first visit <u>http://ds.gmu.edu/</u> for detailed information about the Disability Services registration process. Then please discuss your approved accommodations with me. Disability Services is located in Student Union Building I (SUB I), Suite 2500. Email: <u>ods@gmu.edu</u> | Phone: (703) 993-2474

Student Privacy and Student Rights under FERPA can be found at: http://registrar.gmu.edu/ferpa/

## **COURSE SCHEDULE**

	Date	Торіс	Assignment	Reading
				https://youtu.be/_V8eKsto3Ug (First 20 minutes and then Importing Data
				(@1:34:18)
1	8/23/2022	HLM Introequations, random v. fixed effects	Poster Interests	Textbook Ch. 1
	8/25/2022	HLM—Equations→ R Syntax, importing data		Textbook Ch. 2
2		HLMrunning models practice	Working with HLM Part I	Textbook Ch. 3
	9/1/2022	HLMrunning models practice	Working with HLM Part II	
3	9/6/2022	HLMrunning models practice	Finish HLM Part III	Exemplar: Rimm-Kaufman et al. (2009) Optional: Textbook Ch. 4
	9/8/2022	Moderation in multi-level models	Interactions in HLM	Peugh (2009)
4	9/13/2022	HLM Workshop	Finish HLM In-Class Workshop	Enders & Tofighi (2007)
	9/15/2022	HLM Growth Presentation		Textbook Ch. 5
5	9/20/2022	HLM Growth in R Demonstration		Fairchild & McQuillin (2010)
	9/22/2022	HLM Growth Assignment	HLM Growth	Enders (2013)
	0/07/0000	Missing Data: Mean, Single, Stochastic, Multiple		Woods et al (2021)
6		Imputation	Multiple Imputation	https://doi.org/10.31234/osf.io/mdw5r
_		Missing Data: Analyzing Multiply Imputed Data	EXAM 1 Out	
7		Poster Check in		Loehlin (2004)
		SEM Intro	Exam 1 Due, Poster RQs	Ωnyx User Manual
		NO CLASS – Monday Classes Meet this day		
		Ωnyx Tutorials & CFA	CFA	Oertzen et al (2015)
9		CFA Part 2		
	10/20/2022	SEM - path analysis	Poster Codebook	
				Exemplar: Verboom et al (2013) Extension:
10	10/25/2022	SEM - transactional		https://youtu.be/buXM38NaK9s
	10/27/2022	SEM - growth	Poster Analysis Plan	Hamaker et al (2015)
11		SEM - growth practice & plotting, latent basis growth	SEM Growth	Exemplar: Curby et al. (2008)
	11/3/2022	SEM - bivariate growth	Bivariate Growth	
		SEM- multi-group analysis	Poster: Results	
		SEM- multi-group analysis (re-do path analysis)	Poster: Rough Draft	Selig & Preacher (2009)
13		SEM- multi-group analysis	Poster Rough Draft Due; Exam 2 OUT	
1.4		Latent Difference Score Model		Grimm et al (2016)
14		SEM- Onyx imputation, factor scores, Bayesian NO CLASS THANKSGIVING	EXAM 2 DUE	
15			Destau Elect	
15		Student Poster Presentations Student Poster Presentations	Poster Final	
	12/1/2022	Suucht i Oster FIESCHAUOUS
